

Vinayak Badgujar - Lead QA Engineer

Navi Mumbai, India | 📞 +91 9028490824 | ✉️ vinayakbadgujar29@gmail.com |  [LinkedIn](#)

PROFILE SUMMARY

Results-oriented QA Engineer with 10+ years of experience in manual testing, automation testing using Playwright with JavaScript/TypeScript, and API testing with Postman across e-commerce, insurance broking, and LMS/EdTech domains. Proven track record of leading QA teams, defining test strategies, and leveraging AI-driven tools to enhance test coverage and product quality. Strong collaborator with cross-functional teams, with hands-on expertise in Postman, Playwright, TestRail, and Agile/Scrum methodologies. Successfully achieved a 100% improvement in productivity by replacing manual testing efforts with robust API automation, and migrating UI automation from TestRigor to Playwright, delivering scalable, maintainable, and high-performance automation solutions that accelerated release cycles and improved overall product quality.

SKILLS

- **Test Management:** Test Planning, Preparation, Execution, Reporting, Quality Assurance
- **Test Planning:** Analysis, Scoping, Estimation, Scheduling, Resourcing, Budgeting, Forecasting
- **Test Execution:** Prioritization, Validation, Defect Tracking, Regression
- **Automation:** Playwright, Selenium, Postman (API), TestRigor, and framework design
- **Deployment:** Jenkins, CI/CD pipelines, AWS
- **Tools and Technologies:** TestRail, Jira, Bugsnag, Kibana, GitHub, SQL, Java, TypeScript
- **Team Leadership:** Onboarding, Mentoring, Coaching, Collaboration, Stakeholder Management
- **Soft Skills:** Critical Thinking, Problem-Solving, Effective Communication, Time Management

WORK EXPERIENCE

Lead QA Engineer

Cornerstone OnDemand, Mumbai, India

Nov 2022 – Present

- Led QA efforts across 5+ high-impact projects (Integration, Platform, Groups, Wallet, and Payment Gateway projects), ensuring end-to-end quality coverage and on-time delivery for high-visibility releases.
- Designed and implemented comprehensive API and UI test strategies, improving test coverage by 40%, and reducing defect leakage into production by 30%.
- Hired, mentored, and coached 8-10 junior and senior QA team members, enhancing team productivity and enabling a 25% faster test execution cycle through structured guidance and process improvements.
- Drove automation initiatives using Playwright and Carina frameworks, contributing to a 100% improvement in productivity by replacing manual testing with scalable API and UI automation.
- Migrated UI automation from TestRigor to Playwright, resulting in a more stable, maintainable framework, with a 70% faster execution time.
- Managed and optimized test case repositories in TestRail, improving traceability, and reducing test duplication by 20%.
- Collaborated closely with cross-functional teams—developers, product owners, and architects—to drive quality-first decision-making and ensure seamless integration across modules.
- Leveraged AI-driven test tools and analytics to enhance test prioritization, accelerate defect triage, and improve overall QA efficiency.
- Actively contributed to Agile/Scrum ceremonies (Sprint Planning, Grooming, Retrospectives), ensuring continuous improvement across the SDLC.

Specialist Quality Engineer

LTI, Navi Mumbai, India

Oct 2021 – Nov 2022

- Collaborated with key stakeholders to gather, refine, and validate monthly release tasks, ensuring clear scope definition and alignment with business priorities.
- Planned and prioritized release activities based on team capacity, resulting in a 20–30% improvement in workload distribution, and consistent on-time delivery.
- Provided accurate effort estimations for each task, improving sprint predictability, and reducing estimation variance by 15%.
- Identified and removed impediments impacting QA progress, enabling the team to maintain a 95% sprint completion rate.
- Delivered all planned tasks by the end of each monthly release cycle, maintaining a 100% on-time delivery record across multiple consecutive releases.
- Maintained and analyzed monthly QA activity data, generating reports to present progress, risks, and quality metrics to stakeholders, improving transparency and decision-making efficiency by 30%.
- Strengthened cross-functional collaboration with product, development, and operations teams, driving smoother releases, and faster issue resolution.

Quality Engineer

EdCast Asia Pvt Ltd, Mumbai, India

Mar 2018 – Jun 2021

- Managed QA for Groups, Wallet, and Payment Gateway Integration projects
- Developed and Maintained a scalable Selenium WebDriver test suite.
- Focused on functional, regression, and integration testing
- Improved API test coverage using Postman and SQL/MongoDB for validation

Quality Engineer

Naaptol Online Pvt Ltd, Navi Mumbai, India

Mar 2015 – Mar 2018

- Worked on Order Management (OMS), Warehouse Management (WMS), and Logistics Provider
- Responsible for System Testing, Sanity and Smoke Testing, Functional and Non-Functional Testing, Database Testing, API Testing, Bug Tracking
- Developing and maintaining selenium test scripts for web applications.
- Collaborated with developers to identify and resolve software issues, leading to higher product reliability.

EDUCATION

Rajendra Mane College of Engineering and Technology

Bachelor Of Technology in Information Technology

Ratnagiri, India

Aug 2011 – Aug 2014

AWARD

- **Go^{Mx} Annual Hall of Fame 2022**
