

Pricing Table

Purchase as per your need and requirements.

Job Email will be sent on every weekday Mon-Friday, if any day is missed due to holiday or technical issues, the same number of days will be added to your subscription.

	Freemium	Exclusive
Is this plan for me?	I just want the email, even once in a while is fine with me, even if the jobs are hidden, is also fine	My job and time worth more than these charges. I not only want the email but I want the email ids extracted separately as well, along with other summary details + Plus any other add-on that gets added.
Charges	Free	Rs. 100 Per Month

Process to get membership:

- Scan the below code or pay via upi at **rateshb@okaxis**(Email us for other payment options or yearly plans)
- Take the screenshot of payment
- Email the following details to **bansalitadvisory@gmail.com** :
 1. Payment Screenshot
 2. Email Id where you want to receive the email
 3. Transaction Reference, Amount and Date of Payment
 4. What Experienced Level Jobs you want to subscribe to (Freshers / Experienced)
 5. What type of jobs you want to subscribe to (Developer / Testing)
 6. Mobile number for Whatsapp Group: (If you want to join, otherwise put NA)

Total Jobs	690
Date	2026-02-11

Mahendran Mahesh R	Post	India.Careers@Ltts.com , Digvijay.kumar_ext@Ltts.com	5 , 6 , 7	L&T Technology Services is #Hiring for Senior / Lead Engineer (#Python #Automation & Telematics Tools) Location : #Mysore We are looking for an experienced Senior Engineer / Lead Engineer (5+ years) with strong skills in Python automation, data processing, and telematics tooling to join our team. Key Responsibilities: Lead the design and development of Python-based GUI tools for post-processing telematics data across GNSS, V2X, NAD/Modem and other vehicle features. Efficiently extract and decode binary data from TCP, UDP, and SOME/IP layers in multi-GB vehicle test logs. Build interactive Plotly visualizations (histograms, scatter plots, map views) to convert raw data into insights. Evaluate new technologies (GNSS, V2X, NAD/Modem) and implement improvements to boost tool efficiency and scalability. Perform deep log analysis, root-cause investigation, and deploy robust fixes. Work closely with customer SPOCs, testers, and cross-functional teams to gather requirements and drive continuous improvement. Ideal Candidate: 5+ years experience in Python development & automation Strong knowledge of telematics, networking layers, and binary data formats Experience with GUI frameworks (PyQt / Tkinter) Skilled in data visualization (Plotly preferred) Excellent debugging & communication skills If you're passionate about Python tooling, automation, and automotive data engineering—we'd love to hear from you! Interested candidates can DM or share their resumes. Digvijay.kumar_ext@Ltts.com, India.Careers@Ltts.com
Sri Lalitha	Post	Lalitha@softpathtech.com	5 , 6 , 7	Hiring: IT Software Engineer – Data & AI Expert Location: Bangalore, India Experience: 5+ Years Notice Period: Up to 1 Month We are looking for a Senior IT Software Engineer – Data & AI Expert to design and build scalable, enterprise-grade AI and data platform components. This role blends hands-on engineering, platform thinking, and cross-team collaboration. Key Responsibilities * Design and develop AI platform components including core services, SDKs, client libraries, and reusable modules * Build and maintain REST & gRPC APIs with versioning, backward compatibility, and OpenAPI/IDL specifications * Develop CLIs and developer tools for onboarding, testing, and deployments * Integrate backend services with UI components and ship production-ready frontend features * Build, package, and version SDKs/client libraries across multiple languages * Design and operate data pipelines (ingestion, transformation, feature preparation) with monitoring and quality controls * Collaborate with ML & DevOps teams on model training, serving, and MLOps workflows * Ensure performance, reliability, and security through testing, benchmarking, and best practices * Create clear documentation, examples, and developer guides * Continuously improve Developer Experience (DX)

Key Responsibilities Design, develop, and maintain scalable Java backend applications Build and integrate robust RESTful APIs Implement microservices using Spring Boot / Spring Cloud Optimize performance, security, and reliability Work closely with frontend, DevOps, and product teams Participate in code reviews, architecture discussions, and CI/CD pipelines Must-Have Skills 9+ years of hands-on Java backend experience Strong expertise in Java 8+, Spring Boot, Spring Framework, JPA/Hibernate Microservices architecture experience SQL & NoSQL databases (MySQL, PostgreSQL, MongoDB) REST APIs, OAuth2, JWT Docker & Kubernetes Cloud exposure (AWS / GCP / Azure) Git & Agile methodologies Please share your resume on Neha.kaushik@flairdeck.com
Nikita Maithani	Post	Nikita.Maithani@avendumtech.com , hr@avendumtech.com	7 , 8 , 9 , 10	#Hello_Everyone!!! We are looking for a Senior Java Developer to join our dynamic team at Avendum Technologies in Gurugram! If you're an experienced Java/J2EE guru with 7-10 years under your belt, and you thrive on building high-performance, backend-heavy systems, then this is your chance to make a significant impact. We're on the hunt for someone who excels in API design, performance optimization, and drives technical excellence, with a basic understanding of AI/ML concepts. #Please_note: Applicants with less than 7 years of experience will not be considered. At Avendum Technologies, we specialize in crafting integrated enterprise solutions and delivering unified experiences for our diverse clientele. You'll play a pivotal role in this, not just by writing exceptional code, but also by mentoring our bright junior engineers and fostering a culture of continuous improvement. Here's what we're seeking in your expertise: *7-10 years in Java/J2EE (including Spring Framework, multi-threading, and caching techniques). *Deep understanding of Data Structures, Algorithms, & Object-Oriented *Programming (OOP) principles. *Proven experience designing and developing RESTful APIs and event-driven architectures. *Strong command of RDBMS (Oracle, PL/SQL) and/or NoSQL datastores. *A passion for performance optimization (memory management, garbage collection) and robust debugging/security practices. *Proficiency with code management tools like GitHub. *Basic knowledge of AI/ML concepts is a valuable plus! *Knowledge of JavaScript + Angular/React Js/Typescript is also a plus! Ready to innovate and inspire with Avendum Technologies? Have questions? Feel free to reach out to Nikita Maithani for more details: Nikita.Maithani@avendumtech.com or hr@avendumtech.com #JavaDeveloper #CoreEngineer #BackendDevelopment #SpringFramework #Hiring #AvendumTechnologies #Gurugram #ITJobs #CareerOpportunity #NowHiring #JavaJobs #SoftwareEngineer #FullStackDeveloper #APIDevelopment #Microservice #CloudComputing #TechJobs #EngineeringJobs #JobSearch #IndiaJob #DelhiNCR #JavaCoding

Monika Sharma	Post	monika@firstcalli.com	3 , 4 , 5 , 6 , 7	Urgent Hiring For Conversational AI Developer- Quality engineer Designation- Quality Engineer Role- Permanent/ Full time Experience- 3+ years Location- Noida/ Gurgaon/ Pune/ Bangalore Shift- 12:00 PM to 10:00 PM (10 Hours Shift. Also depends on the project/work dependencies) Working Days- 5 days Work Mode- Hybrid Overview: We are seeking a skilled Quality Assurance (QA) Engineer with 3–7 years of experience in testing, QA, and reporting within the dynamic fields of Conversational AI and Agentic AI/LLMs. The ideal candidate will be passionate about ensuring the quality of cutting-edge AI systems, with a particular focus on conversational platforms, intelligent agents, and large language models (LLMs). Mandatory Skills- Experience into any Manual and Automation testing. Experience into Conversational AI/ Chatbot.

Posted By	Post Link	Contact Info	Experience	Raw Text
				Experience into either Agentic AI or LLM (any one) Key Responsibilities: Develop and execute test cases, scripts, and procedures for both Conversational AI applications and Agentic AI/LLM systems. Collaborate with product managers, developers, and stakeholders to maintain quality standards throughout the product lifecycle. Conduct functional, regression, integration, and performance testing on Conversational AI platforms, agentic AI frameworks, and LLM-based solutions. Identify, document, and track defects using JIRA, providing detailed insights and reports on testing outcomes. Analyze business and technical requirements to design test strategies tailored to Conversational AI and Agentic AI/LLM use cases. Evaluate the usability, effectiveness, and scalability of AI-driven applications, offering actionable feedback. Generate comprehensive test reports and summaries for stakeholders, highlighting key findings and recommendations. Continuously improve QA methodologies to meet the evolving demands of Conversational AI and Agentic AI technologies. Required Qualifications: 3–7 years of experience in software testing and quality assurance, with expertise in Conversational AI and Agentic AI/LLMs. Strong understanding of standard testing practices, methodologies, and tools for AI applications. Hands-on experience with JIRA for defect tracking and project management. Proficiency in Excel for data analysis and reporting. Knowledge of functional and non-functional testing, including performance and security testing. In-depth familiarity with LLMs, agentic AI systems, and conversational technologies. Proven ability to work effectively in cross-functional teams within fast-paced environments. Excellent problem-solving and analytical skills. Interested candidates may drop their resumes on monika@firstcalli.com

Monika Sharma	Post	monika@firstcalli.com	3 , 4 , 5 , 6 , 7	Urgent Hiring For Conversational AI Developer- Quality engineer Designation- Quality Engineer Role- Permanent/ Full time Experience- 3+ years Location- Noida/ Gurgaon/ Pune/ Bangalore Shift- 12:00 PM to 10:00 PM (10 Hours Shift. Also depends on the project/work dependencies) Working Days- 5 days Work Mode- Hybrid Overview: We are seeking a skilled Quality Assurance (QA) Engineer with 3–7 years of experience in testing, QA, and reporting within the dynamic fields of Conversational AI and Agentic AI/LLMs. The ideal candidate will be passionate about ensuring the quality of cutting-edge AI systems, with a particular focus on conversational platforms, intelligent agents, and large language models (LLMs). Mandatory Skills- Experience into any Manual and Automation testing. Experience into Conversational AI/ Chatbot. Experience into either Agentic AI or LLM (any one) Key Responsibilities: Develop and execute test cases, scripts, and procedures for both Conversational AI applications and Agentic AI/LLM systems. Collaborate with product managers, developers, and stakeholders to maintain quality standards throughout the product lifecycle. Conduct functional, regression, integration, and performance testing on Conversational AI platforms, agentic AI frameworks, and LLM-based solutions. Identify, document, and track defects using JIRA, providing detailed insights and reports on testing outcomes. Analyze business and technical requirements to design test strategies tailored to Conversational AI and Agentic AI/LLM use cases. Evaluate the usability, effectiveness, and scalability of AI-driven applications, offering actionable feedback. Generate comprehensive test reports and summaries for stakeholders, highlighting key findings and recommendations. Continuously improve QA methodologies to meet the evolving demands of Conversational AI and Agentic AI technologies. Required Qualifications: 3–7 years of experience in software testing and quality assurance, with expertise in Conversational AI and Agentic AI/LLMs. Strong understanding of standard testing practices, methodologies, and tools for AI applications. Hands-on experience with JIRA for defect tracking and project management. Proficiency in Excel for data analysis and reporting. Knowledge of functional and non-functional testing, including performance and security testing. In-depth familiarity with LLMs, agentic AI systems, and conversational technologies. Proven ability to work effectively in cross-functional teams within fast-paced environments. Excellent problem-solving and analytical skills. Interested candidates may drop their resumes on monika@firstcalli.com

company: OIX Consulting	Post	brooke@qixconsulting.com		We're #hiring SIT Refresh Consultant – Melbourne (ASAP start) Contract This person will be supporting a major banking program based in Melbourne. In simple terms, this role is all about making sure test environments are ready, stable, and usable so testing teams can do their job properly — without delays, data issues, or last-minute chaos. What you'll be doing: Refreshing and preparing SIT (System Integration Testing) environments Making sure the right data is in place for testing Coordinating with developers, testers, infrastructure, and release teams Supporting the testing phase when things break (because they always do) Helping keep environments stable throughout the SIT cycle You don't need to be a pure tester or a pure infrastructure engineer — this role sits nicely in between.

Posted By	Post Link	Contact Info	Experience	Raw Text
				This role could be a great fit if you've worked as a: SIT / UAT Environment Manager Test Environment or Data Refresh Specialist Technical Test Lead or Test Analyst with strong environment exposure Release, Deployment, or CI/CD Support Specialist Application Support or Integration Support Consultant Additionally if you have worked in Automation then that would be a bonus! If you're someone who understands how systems, data, and environments come together — and you enjoy being the person who makes testing run smoothly — this one's worth a look. Melbourne-based Leading bank Starting ASAP If this sounds like you (or someone you know), get in touch or send your resume to brooke@qixconsulting.com #testing #testanalyst #testautomation

Ganesh Suryakant Umate	Post	ganesh.u@jhex.info		Why your H1B resume is being ignored (and how to fix it) Applying to 100+ roles and getting zero callbacks? In 2026, "Manual Tester" or "General Developer" resumes are hitting the digital shredder. At Job Hunting Experts, we've analyzed why. The market isn't just looking for talent; it's looking for Cloud-Optimized Authority. If your profile doesn't scream "Terraform," "AWS," and "Python Automation" within the first 3 seconds, a recruiter has already moved on. The Visibility Hack: We help our candidates shift from "Job Seekers" to "Solution Providers." We don't just fix your resume; we optimize your Technical Narrative so that hiring managers see a "Sponsorship-Worthy" expert, not a risk. The US market is fast. Job Hunting Experts is faster. Stop applying blindly. Start getting noticed. Secure your H1B future. Email your resume to ganesh.u@jhex.info or DM me "OPTIMIZE" for a free profile audit. #H1BVisibility #ResumeHack #CloudNative #JobHuntingExperts #TechCareers2026 #Terraform #AWS #CareerPivot

monishasri ganesan	Post	monish@brainhunters.com.my	4 , 5 , 6	We're Hiring: Senior Software QA Automation Engineer (AI-Driven) Location: Kuala Lumpur (KL) Full-time Salary: RM 10,000 – RM 15000 (negotiable) We are seeking a Senior Software QA Automation Engineer to lead AI-driven test automation initiatives across web, mobile, and API platforms. This role offers the opportunity to build scalable automation frameworks while integrating Generative AI into the QA lifecycle. Key Highlights • AI-assisted test case and script generation • Automation using Playwright (Web) and Appium (Mobile/Desktop) • API testing with Postman • Performance testing using JMeter • CI/CD integration via Azure DevOps Requirements • 4+ years of QA experience (automation-focused) • Strong hands-on experience with Playwright, Appium, Postman, and JMeter • Experience working with GenAI tools (GPT / Claude / Gemini) • Only Malaysian Interested? send your resume to monish@brainhunters.com.my or Whatsapp (+60167883549) Muhan Krishnan Shashindran Ravindran Kai Iskandar Tarvin Muhunthan
Monika K	Post	mounika.k1341@gmail.com	12 , 13 , 14	Open to Opportunities Senior Frontend Developer (React & Angular) Hi LinkedIn , I'm currently open to Senior Frontend Developer roles where I can apply 12+ years of experience building robust, scalable, and accessible web applications using React and Angular. My focus is on translating complex business requirements into clean, modular UI solutions, building reusable components, and collaborating closely with UX, product, and backend teams to deliver high-quality user experiences. What I do best: - Build modern UIs with React.js, Angular (11–17), and TypeScript - Design component-driven architectures and reusable UI libraries - Integrate frontend applications with REST APIs and backend services - Ensure quality with automated testing (Jest, Playwright, Cypress) - Optimize performance using lazy loading, code splitting, and memoization - Implement CI/CD pipelines using GitHub Actions, Jenkins, Azure DevOps - Develop WCAG-compliant, cross-browser user interfaces I enjoy working in environments that value code quality, collaboration, and scalable UI platforms. If you're hiring—or know of a team looking for strong React & Angular expertise—feel free to connect or message me. mounika.k1341@gmail.com 571-660-5765 #OpenToWork #SeniorFrontendDeveloper #ReactJS #Angular #TypeScript #FrontendEngineering #WebApplications #Hiring

				We are seeking a highly skilled Technical Lead with expertise in Dot Net and Full Stack development to join our dynamic team at NewRez. In this role, you will be responsible for leading the technical design and development of web applications and services. You will work closely with stakeholders to gather requirements, define technical specifications, and ensure that the solutions meet both business and technical needs. Your leadership will guide a team of developers, ensuring adherence to best practices, code quality, and timely delivery of projects. You will also be involved in architectural decisions and contribute to ongoing improvements and innovations within our software development processes. Skills Required: - Strong proficiency in .NET framework and .NET Core for application development. - Experience with front-end technologies such as HTML, CSS, JavaScript, and modern frameworks (e.g., Angular, React, or Vue.js). - In-depth knowledge of back-end development, including database technologies such as SQL Server or NoSQL databases. - Familiarity with software development methodologies, including Agile and Scrum. - Excellent problem-solving skills and ability to debug complex software issues. - Strong communication and interpersonal skills for effective collaboration with team members and stakeholders. - Proven leadership skills with experience managing and mentoring developers. Tools Required: - Visual Studio and/or Visual Studio Code for development. - Version control systems such as Git or Azure DevOps. - Database management tools (e.g., SQL Server Management Studio). - Project management tools (e.g., JIRA, Trello) for tracking progress and collaboration. - Containerization and virtualization tools (e.g., Docker, Kubernetes) for application deployment. This position offers a unique opportunity for a seasoned technical leader to make a significant impact in a fast-paced environment while advancing your career with NewRez. We are looking for an innovative thinker who is passionate about technology and committed to delivering exceptional solutions. Roles & Responsibilities: - The Technical Lead will be responsible for designing, developing, and maintaining full-stack applications using Dot Net technologies. - This role requires collaborating with cross-functional teams to ensure the successful delivery of software solutions. - The candidate will oversee technical design reviews and guide the development team in best practices. About the Team: - The team consists of experienced software developers, quality assurance professionals, and project managers dedicated to delivering high-quality software solutions.

				Summary The Guidewire BillingCenter Developer is responsible for designing, configuring, and integrating billing workflows within the Guidewire suite. This role focuses on end-to-end delivery of billing solutions, including data migration, system integrations, and compliance with industry standards. The ideal candidate brings strong coding skills in Gosu and Java, combined with deep knowledge of P&C insurance billing processes. Responsibilities • Configure and enhance BillingCenter modules such as invoices, payment plans, collections, write-offs, and adjustments. • Develop business rules, scripts, and integrations using Gosu and Java to extend BillingCenter functionality. • Build and maintain web service integrations (REST/SOAP) between BillingCenter and external systems including policy, claims, and financial platforms. • Write and optimize SQL queries, stored procedures, and data transformations to support billing data ingestion and migration. • Collaborate with cross-functional teams to define requirements, create technical designs, and produce architecture documentation. • Support production environments by troubleshooting issues, tuning performance, and coordinating upgrades or version control activities. • Ensure compliance with regulatory frameworks such as PCI-DSS and NACHA, maintaining data integrity and system security. • Participate in Agile development cycles, contributing to sprint planning, code reviews, and technical documentation. • Provide technical guidance during planning phases to ensure scalable and maintainable architecture decisions. Requirements • 5–8 years of experience working with the Guidewire platform, with a focus on BillingCenter with Cloud Integration; familiarity with PolicyCenter and ClaimCenter preferred. • Proficiency in Gosu and strong working knowledge of Java development on the JVM. • Experience with relational databases (Oracle, SQL Server, or similar) and strong SQL skills for data migration and modeling. • Proven experience integrating BillingCenter with external systems using REST or SOAP web services, and handling XML/JSON data formats. • Solid understanding of Property & Casualty (P&C) insurance billing processes including payments, collections, and reconciliations. • Strong collaboration and communication skills for working with technical teams and business stakeholders. • Ability to produce design diagrams, map data flows, and document system integrations clearly. #guidewire #billingcenter #cloudintegration #policycenter #cloudcenter #cloudintegration #gosu #javadevelopment #oracle #sqlserver #rest #soap #property #casualty

Ineta Svedaite	Post	ineta@wearexena.com		I have been speaking to a lot of engineers in Berlin lately who are thinking about their next move but not actively looking. The pattern I keep seeing is that people want something real. Not just another well-funded idea. They want a product that is already working, a team that is building intentionally, and problems that are worth solving. Right now I am hiring for two Kotlin roles, both remote in Germany, that fit that description. Senior Backend Engineer at a bootstrapped Berlin startup. They are building infrastructure in a regulated space that helps people relocate. The product is already generating revenue and the engineering challenges are around scale, user experience, and making core technical decisions. Kotlin/Java, AWS.

Posted By	Post Link	Contact Info	Experience	Raw Text
				Real ownership over what gets built. Backend Engineer at a Series A AI startup. They are building AI-powered tooling in healthcare. The product is already deployed across hundreds of locations and the team is scaling quickly. Backend role focused on Kotlin and Coroutines, building the services and APIs that power the core product. Fast-moving, high-impact work. One is bootstrapped and profitable. The other is venture-backed and growing fast in a regulated industry. If either sounds interesting and relevant, or you know someone who might be interested, message me here or email me at ineta@wearexena.com

Lakshmi Padmaja Gunda	Post	padmaja.gunda@allruva.com		Hiring: Salesforce QA Engineer Remote 3:00 PM – 12:00 AM IST We are looking for an experienced Salesforce QA Engineer with strong expertise in: Mobile Testing (LambdaTest / BrowserStack) Web Testing & Salesforce Application Testing Azure DevOps (ADO) – CI/CD, project tracking Selenium Automation & test frameworks The ideal candidate should have solid knowledge of Salesforce architecture, hands-on testing experience, Agile exposure, and the ability to coordinate effectively between offshore and onshore teams. If you have a strong QA background with expertise in automation and ADO, we'd love to connect! Share your profile or padmaja.gunda@allruva.com
Petri Matta	Post	petri@nextjob.bg		We're closing applications in 2 days. Not because we love deadlines... Because we're hiring exactly 3 developers this quarter, and we've already had 68 applications. Ten engineers working remotely from Bulgaria. All building data and AI solutions for European clients. No commute. Just technical work. Why only three: Each new developer gets direct mentorship. We pair you with client projects that match your growth. We onboard as a cohort March 16th. Next chance? Q3 2026. Your work: Full stack: .NET + Python backends, React/Angular frontends Data pipelines with Pandas, PySpark, SQL Azure deployment and architecture Direct client consulting Internal AI product development German engineering You've done this: Shipped full stack applications in production. Written Python for real data work. Talked to clients about technical decisions. Know Azure beyond tutorials. The edge: German speakers move to front of line. Only 3 of our 10 developers speak it. Client demand is 3x our capacity. Sofia Developers are commenting: "this position is awesome" Apply: Email CV to petri@nextjob.bg. Subject: "Bulgaria Q1" (Only Bulgarian developers.) Or DM ME. Timeline: Feb 10: First rounds start (15 calls max) Feb 12: Deadline Feb 24: Offers out 68 applications → 3 spots Apply now before it's too late. Haide! #DotNet #Python #React #Angular

Yuva Sai Raja	Post	yuva@hiremaven.co.in	2 , 3 , 4 , 8 , 9 , 10	#Hiring #Lead #SDET Lead SDET – AI-Driven Test Automation REMOTE opportunity(Immediate Joiners are preferred) Work Type : Permanent Position Budget : Open(No Bar) About the Role We are looking for a Lead SDET to design and own our end-to-end test automation strategy, with a strong focus on AI- and ML-powered testing. In this role, you will drive quality at scale for our AI-first platform, mentor engineers, and collaborate closely with Product, Engineering, and DevOps teams to ensure fast, reliable, and high-quality releases. What You'll Do - Define and implement a comprehensive automation strategy across web, APIs, backend services, and data workflows. - Build and maintain scalable automation frameworks with AI-assisted capabilities such as self-healing tests, intelligent test prioritization, and flaky test detection. - Leverage AI/ML models to generate, optimize, and maintain test cases from requirements and user stories. - Integrate AI-powered analytics to detect anomalies in system performance, user flows, and error patterns. - Use NLP models to create chatbot-driven test cases and validate conversational interfaces. - Collaborate with developers to drive shift-left testing, including AI-driven unit and integration test generation. - Define and own quality dashboards with predictive insights such as defect trends, release risk scoring, and automated root-cause suggestions. - Perform AI-based regression impact analysis to optimize test execution pipelines. - Explore generative AI tools for auto-generating mock data, load scenarios, and security attack simulations.

Posted By	Post Link	Contact Info	Experience	Raw Text
				Mentor and guide team members in adopting AI-first testing practices and best-in-class QA standards. What We're Looking For 8+ years of experience in QA / SDET roles, with 2+ years in a leadership or lead role. Strong programming skills in Python, Java, JavaScript, or TypeScript. Hands-on experience with test automation frameworks such as Selenium, Playwright, Cypress, etc. Solid expertise in API testing using tools like Postman, RestAssured, Java HTTP Client, or similar. Proven experience integrating AI/ML tools into automation pipelines, including: - Self-healing automation tools (Testim, Mabl, Functionize, etc.) - AI-driven test case generation and prioritization - Intelligent anomaly detection for QA metrics - Familiarity with AI-based load and performance testing, including ML-driven scale and failure prediction. - Strong experience with CI/CD pipelines (GitHub Actions, Jenkins, GitLab, etc.), including AI integrations. - Knowledge of data validation testing for AI/ML models (bias detection, data drift, accuracy validation) is a strong plus. - Excellent communication, leadership, and mentoring skills, with the ability to influence across teams. Interested candidates can send your cv's at yuva@hiremaven.co.in will connect with you directly. Hire Maven #Lead #Test #Engineer #SDET #AI #ML #Automation #Framework #selenium #Java #Python #Integration #APITesting #Remote #Hiring #NowHiring
company: Zoiko Group	Post	zoikohr01@gmail.com	7 , 8 , 9	Senior Automated Tester (AI-Accelerated, Enterprise Platforms) Zoiko Industries Pvt Ltd (Zoiko Group) Location: Remote – India Only Experience: 7+ Years (Mandatory) Application Deadline: 12 February 2026 Zoiko Industries Pvt Ltd is an AI-driven global technology group building enterprise-grade digital platforms. We're hiring a Senior Automated Tester to lead automation and quality for high-scale, cloud-native applications. This is a senior role requiring strong technical expertise, strategic QA ownership, and AI-driven testing practices. The Role As a Senior Automated Tester, you will design and maintain automated testing frameworks that enable continuous delivery across enterprise systems. You'll collaborate with engineering and DevOps teams to ensure quality, performance, and security at scale. Required Experience & Qualifications 7+ years of experience in software testing with strong automation expertise - Bachelor's degree in Computer Science, IT, Engineering, or a related field - Testing or QA certification (ISTQB or equivalent preferred) - Experience with enterprise-scale or mission-critical systems - Proven, verifiable technical ownership in prior roles Technical Expertise (Mandatory) - Strong automation framework experience (web & API) - Hands-on with Selenium, Playwright, Cypress, or similar - API testing (REST, JSON, auth) - Programming skills in Java, Python, or JavaScript - CI/CD integration and Agile–DevOps understanding AI-Accelerated Testing (Required) - Practical use of AI tools in test automation and optimisation - Ability to validate and refine AI-generated results Quality, Performance & Security Awareness - Strong grasp of functional, regression, performance, and security testing - Ability to identify and escalate quality risks early What You Will Do - Build and maintain scalable automation frameworks - Define and drive testing strategy with engineering teams - Validate APIs and complex workflows - Ensure test stability, quality metrics, and release readiness - Mentor testers and promote best practices Remote-First Expectations - Comfortable working independently in a remote setup - Clear written communication and documentation skills - Strong ownership of timelines and quality outcomes Pre-Screening Requirements (Mandatory) Application Requirements - Updated CV with clear role and project details - Verifiable LinkedIn profile - Short summary of two automation initiatives you led

Shaik Feroz	Post	feroz@ventois.com	5 , 6 , 7 , 8	#hiring Urgently looking for Guidewire BillingCenter Developer with Cloud Integration // USA / Canada (Remote) share me resume at feroz@ventois.com. Role: Guidewire BillingCenter Developer with Cloud Integration Location: USA / Canada (Remote) Duration: 6 month+ can be extendable Visa Status: H1B, H4EAD, L2EAD, GCEAD. NO GC & US CITIZEN Summary The Guidewire BillingCenter Developer is responsible for designing, configuring, and integrating billing workflows within the Guidewire suite. This role focuses on end-to-end delivery of billing solutions, including data migration, system integrations, and compliance with industry standards. The ideal candidate brings strong coding skills in Gosu and Java, combined with deep knowledge of P&C insurance billing processes. Responsibilities • Configure and enhance BillingCenter modules such as invoices, payment plans, collections, write-offs, and adjustments. • Develop business rules, scripts, and integrations using Gosu and Java to extend BillingCenter functionality. • Build and maintain web service integrations (REST/SOAP) between BillingCenter and external systems including policy, claims, and financial platforms. • Write and optimize SQL queries, stored procedures, and data transformations to support billing data ingestion and migration. • Collaborate with cross-functional teams to define requirements, create technical designs, and produce architecture documentation. • Support production environments by troubleshooting issues, tuning performance, and coordinating upgrades or version control activities. • Ensure compliance with regulatory frameworks such as PCI-DSS and NACHA, maintaining data integrity and system security. • Participate in Agile development cycles, contributing to sprint planning, code reviews, and technical documentation. • Provide technical guidance during planning phases to ensure scalable and maintainable architecture decisions. Requirements • 5–8 years of experience working with the Guidewire platform, with a focus on BillingCenter with Cloud Integration; familiarity with PolicyCenter and ClaimCenter preferred. • Proficiency in Gosu and strong working knowledge of Java development on the JVM. • Experience with relational databases (Oracle, SQL Server, or similar) and strong SQL skills for data migration and modeling. • Proven experience integrating BillingCenter with external systems using REST or SOAP web services, and handling XML/JSON data formats. • Solid understanding of Property & Casualty (P&C) insurance billing processes including payments, collections, and reconciliations. • Strong collaboration and communication skills for working with technical teams and business stakeholders. • Ability to produce design diagrams, map data flows, and document system integrations clearly. #guidewire #billingcenter #cloudintegration #policycenter #cloudcenter #cloudintegration #gosu #javadevelopment #oracle #sqlserver #rest #soap #property #casualty
