Bachelor of Computer Engineering

Surat, Gujarat

Technical Skills

Programming Languages: C#, JavaScript, SQL, HTML/CSS

Frameworks: Node.js, React, Angular, NestJS, NextJS,.NET Core

Databases & DevOps: PostgreSQL, MongoDB, Docker, Jenkins, GitHub, Azure, Kubernetes

Real-Time Technologies & Tools: SignalR, WebSocket, Redis Queue, JEST, Karma, Selenium, Visual Studio Code, Eclipse, Android Studio

Projects

Enhance React Financial Charts library | *Next, TS*

Jan 2025 – Present

- Enhanced React financial charts library with custom shapes for improved visual clarity and user customization.
- Candlestick charts with custom shapes for improved visual clarity and user customization.

RMEYE Asset Monitoring | *Angular, .NET Web API*

Sep 2023 – Dec 2023

- Achieved reliable data streaming with WebSocket, SignalR, and Redis Queue integrated into Angular and .NET, improving real-time monitoring accuracy and response times.
- Developed a PostgreSQL job to optimize per-second data into daily aggregates, reducing storage.
- Built a customizable alarm service allowing users to set thresholds and trigger alerts for any type of parameters.
- Enabled JSON-based UI customization, allowing users to modify sections and styles without front-end changes.

InstaPlug APIs for Social Media Plugins | *Node.js, Sequelize*

Apr 2023 – May 2023

- Developed a flexible plugin to seamlessly integrate Instagram posts across platforms like websites and portfolios, supporting dynamic content sharing from various account types.
