We're Hiring | Lead Manual QA Engineer

We're looking for an experienced Lead QA Engineer to join our growing team and play a key role in ensuring high-quality product deliveries. If you're passionate about quality, automation, and collaboration — this one's for you!

 Location: Pune / Mumbai / Gurugram / Bangalore (Hybrid)

 Job Type: Full-time, Permanent

 CTC: ₹18 LPA – ₹24 LPA

 Qualification: BE / BTech / MCA

 Function: Manual Testing

 Experience: 5–8 years overall

Role Overview

As a Lead QA Engineer, you'll evaluate product quality, contribute to robust test automation solutions, and work closely with the QA Lead and development teams to ensure top-notch releases. Knowledge sharing and continuous improvement are core to this role.

Technologies & Tools

Ruby

Cucumber / Gherkin

Cypress, Playwright, Appium

Typescript

Git

Azure DevOps

SCRUM, Jira & Agile methodologies

Key Responsibilities

Quality Assurance & Testing

Develop and maintain test automation scripts

Perform manual testing when required

Contribute to test automation architecture

Support test strategies, planning, and reporting

Prepare test reports for individual features

Collaboration & Contribution

Work closely with development and QA teams

Manage defect tracking and reporting

Support UAT and customer communication

Mentor and support team members on QA topics

What We're Looking For

2–3 years of experience as Senior QA / SDET / Technical QA
Strong coding skills in Typescript / JavaScript / Python / Ruby / Java
Experience with Azure or AWS
CI/CD exposure: Jenkins or GitHub Actions
Hands-on experience with Agile/Scrum teams
Expertise in test strategies, test plans, and automation frameworks
Comfortable working with distributed/remote teams
Curious, quality-driven, and eager to learn

We're hiring — Business Analyst (Trade Finance & Supply Chain Finance)

📍 Location: Bangalore | Experience: 9–10 years

Are you passionate about Trade Finance & Supply Chain Finance and experienced in translating complex banking requirements into elegant product solutions? We're looking for a hands-on BA to work with corporate clients, banks, product, and engineering teams to shape digital Trade & SCF solutions.

What you'll do:-

- Partner with corporate clients, bankers and internal stakeholders to capture business needs and pain points.
- Elicit, analyse and document requirements (BRD, FSD, Use Cases); run requirement workshops and GAP analysis.
- Translate business flows into functional/interface specs for development teams; maintain traceability across the lifecycle.
- Create AS-IS/TO-BE process maps, process flow diagrams, screen mockups and use case models.
- Work closely with UI/UX, Dev and QA; support UAT planning, test case reviews and sign-offs.
- Coordinate with technical architects and integration teams for interfaces (Core Banking, SWIFT, Host-to-Host, ERP connectors).
- Support client demos, walkthroughs and post-implementation reviews.

Must-have domain & skills:-

- Deep knowledge of Trade Finance: Import/Export LCs, BG/SBLC, Bills, Collections, Open Account trade.
- Strong in Supply Chain Finance: Payables/Receivables Finance, Distributor Finance, Factoring, Reverse Factoring.
- Exposure to SWIFT standards (e.g., MT7xx, MT4xx, MT103/MT202, MT798).
- Experience with banking workflows (Maker-Checker, Limit Utilization, Document Handling, Credit Lines).
- Proven experience preparing BRD/FSD, process flows and client-facing workshops.
- Tools: JIRA, Confluence, Visio/[Draw.io/Figma](#); Excel & PowerPoint; functional test case writing.

Nice-to-haves:-

- Familiarity with Trade/SCF portals or digital banking platforms.
- Understanding of microservices, REST APIs, JSON/XML, Core Banking integrations.
- Basic SQL or data model knowledge; exposure to frontend/backend stacks (Java Spring Boot, Node.js, React/Angular) a plus.
- Experience leveraging AI tools for productivity is a bonus.

Core soft skills:-

- Strong stakeholder management, presentation & communication skills.
- Analytical mindset, attention to detail, and ability to manage multiple priorities.

If this sounds like you — or if you know someone perfect for this role — please email me at adnan.a@tekitsolution.com. Happy to share more details. Kindly like/share to help us reach relevant candidates. 🙌

🚀 We're Hiring | Storage QA | Bengaluru , Hyderabad 🚀

We're looking for a talented Storage Testing /QA with 2-4 years of experience to join our growing engineering team and work on exciting projects.

🧠 We're looking for: Storage QA Engineer

Experience: 2–4 Years

Location: Hyderabad / Bangalore

Employment Type: Full-Time

Job Summary

We are looking for a Storage QA Engineer with 2–4 years of experience in testing storage systems and virtualization environments. The ideal candidate should have hands-on exposure to storage protocols, virtualization platforms, and QA methodologies to ensure high-quality, reliable storage solutions.

Key Responsibilities

- Design, develop, and execute test plans, test cases, and test scenarios for storage products and solutions
- Perform functional, system, integration, regression, and performance testing for storage features
- Validate storage functionalities in virtualized environments
- Test and troubleshoot issues related to storage protocols and file systems
- Work closely with development and product teams to understand requirements and ensure test coverage
- Identify, log, track, and verify defects using defect tracking tools
- Automate test cases where applicable and contribute to test framework improvements
- Analyse test results and provide detailed reports on quality metrics

Mandatory Skills

- 2–4 years of experience in Storage QA / Storage Testing
- Strong understanding of storage concepts (SAN, NAS, DAS)
- Hands-on experience with storage protocols such as:
 - iSCSI
 - NFS
 - SMB / CIFS
 - Fibre Channel (FC)
- Experience with virtualization technologies such as:
 - VMware (ESXi, vSphere)
 - KVM / Hyper-V (good to have)
- Knowledge of Linux OS (basic to intermediate level)
- Experience in test documentation and defect tracking

Good to Have

- Exposure to storage arrays, RAID configurations, and snapshots
- Experience with performance and stress testing tools
- Basic scripting knowledge (Python / Shell)
- Understanding of cloud storage concepts (AWS / Azure – nice to have)

Qualifications

Bachelor's degree in Engineering, Computer Science, IT, or a related field

What We Offer

- Opportunity to work on enterprise-level storage products
- Exposure to advanced virtualization and storage technologies
- Collaborative work environment and career growth opportunities

Urgent Hiring :- QA Engineer – AI and Automation

Location: - Bangalore (Jaynagar)

Budget - Upto 7LPA

Role Overview

As the QA Engineer, you'll ensure the reliability and correctness of the AI stack by developing automated test suites and evaluation frameworks — including using LLMs as judges to assess chatbot accuracy, context retention, and response quality.

Key Responsibilities

- Develop automated test frameworks for the full stack (backend APIs, RAG responses, UI validation).
- Design and maintain datasets for evaluating LLM accuracy and RAG retrieval fidelity.
- Implement automated testing using metrics such as F1 score, BLEU, and LLM-based grading.
- Simulate user interactions and stress test APIs for performance and concurrency.
- Integrate CI/CD pipelines for continuous quality monitoring.

Qualifications

- 3+ years in QA automation, preferably in AI/ML or NLP systems.
- Experience with Python testing frameworks (pytest, unittest).
- Familiarity with REST and WebSocket testing tools (Postman, Locust, k6).
- Understanding of LLM evaluation metrics and prompt-based scoring.
- Nice-to-have: experience with FastAPI and Streamlit testing automation.

Interested candidates can share their CV to: - drishti.tibrewal@nanokernel.net

=====

Urgent Hiring For Conversational AI Developer- Quality engineer

Designation- Quality Engineer

Role- Permanent/ Full time

Experience- 3+ years

Location- Noida/ Gurgaon/ Pune/ Bangalore

Shift- 12:00 PM to 10:00 PM (10 Hours Shift. Also depends on the project/work dependencies)

Working Days- 5 days

Work Mode- Hybrid

Overview:

We are seeking a skilled Quality Assurance (QA) Engineer with 3–7 years of experience in testing, QA, and reporting within the dynamic fields of Conversational AI and Agentic AI/LLMs. The ideal candidate will be passionate about ensuring the quality of cutting-edge AI systems, with a particular focus on conversational platforms, intelligent agents, and large language models (LLMs).

Mandatory Skills-

Experience into any Manual and Automation testing.

Experience into Conversational AI/ Chatbot.

Experience into either Agentic AI or LLM (any one)

Key Responsibilities:

Develop and execute test cases, scripts, and procedures for both Conversational AI applications and Agentic AI/LLM systems.

Collaborate with product managers, developers, and stakeholders to maintain quality standards throughout the product lifecycle.

Conduct functional, regression, integration, and performance testing on Conversational AI platforms, agentic AI frameworks, and LLM-based solutions.

Identify, document, and track defects using JIRA, providing detailed insights and reports on testing outcomes.

Analyze business and technical requirements to design test strategies tailored to Conversational AI and Agentic AI/LLM use cases.

Evaluate the usability, effectiveness, and scalability of AI-driven applications, offering actionable feedback.

Generate comprehensive test reports and summaries for stakeholders, highlighting key findings and recommendations.

Continuously improve QA methodologies to meet the evolving demands of Conversational AI and Agentic AI technologies.

Required Qualifications:

3–7 years of experience in software testing and quality assurance, with expertise in Conversational AI and Agentic AI/LLMs.

Strong understanding of standard testing practices, methodologies, and tools for AI applications.

Hands-on experience with JIRA for defect tracking and project management.

Proficiency in Excel for data analysis and reporting.

Knowledge of functional and non-functional testing, including performance and security testing.

In-depth familiarity with LLMs, agentic AI systems, and conversational technologies.

Proven ability to work effectively in cross-functional teams within fast-paced environments.

Excellent problem-solving and analytical skills.

🚀 We're Hiring: Business Analyst – Trade Finance & Supply Chain Finance 🚀

- ◆ Location: Bangalore, India
- ◆ Experience: 9-10 Years
- ◆ Reporting To: Product Head – Trade & Supply Chain Finance
- ◆ Employment Type: Permanent
- ◆ Work Mode: Hybrid

We are seeking a highly experienced Business Analyst with deep expertise in Trade Finance and Supply Chain Finance (SCF) to join our team! If you have a strong understanding of Trade Finance products, SCF solutions, and can bridge the gap between business stakeholders, clients, and technical teams, we want you on board!

Key Responsibilities:

 **Business Requirements:** Elicit, analyze, and document business requirements in BRD/FSD formats. Conduct requirement workshops, GAP analysis, and process mapping (AS-IS / TO-BE).

 **Client Interaction:** Interact with corporate clients, business users, and banks to understand business processes and pain points.

 **Solution Design & Support:** Work closely with UI/UX, development, and QA teams to ensure alignment of solution design with business needs.

 **UAT Planning:** Participate in UAT planning, test case reviews, and sign-offs.

 **Integration Coordination:** Collaborate with technical architects and integration teams for Trade & SCF system interfaces (Core Banking, SWIFT, ERP connectors).

 **Documentation:** Maintain traceability matrix and ensure end-to-end requirement coverage throughout the lifecycle.

 **Post-Implementation:** Support client demos, product walkthroughs, and post-implementation reviews.

Mandatory Requirements:

 **Domain Expertise:**

- Strong working knowledge of Trade Finance products (LCs, BGs/SBLCs, Bills, Collections, etc.)
- Hands-on experience with Supply Chain Finance products (Payables Finance, Receivables Finance, Factoring, Reverse Factoring, etc.)
- Exposure to SWIFT message standards (MT7xx/MT4xx/MT103/MT202).
- Familiarity with banking workflows like Maker-Checker, Limit Utilization, and Credit Lines.

 **Business Analysis Skills:**

- Proven experience in preparing BRD, FSD, Use Case Documents, and Process Flow Diagrams
- Experience in client-facing roles, conducting requirement workshops, and product walkthroughs
- Strong understanding of the end-to-end Trade & SCF transaction lifecycle.

 **Tools & Methodologies:**

- Proficiency in JIRA, Confluence, Visio, [Draw.io](https://draw.io), FIGMA, and Excel/PowerPoint
- Great to have knowledge of AI tools like Replit, Bolt, Lovable, etc.

 **Interested? Apply Now!**

Looking for an experienced Product Owner to drive the design, evolution, and performance of digital brokerage platforms for both retail and corporate clients. If you have deep expertise in trading products, a strategic mindset, and strong leadership in Agile/Scrum delivery, we want you on our team!

Key Responsibilities:

 Product Strategy & Roadmap

- Define the product vision for online trading platforms (web & mobile).
- Build and manage the product roadmap aligned with Adria B&T and client banks' strategies.

• Prioritize the product backlog and lead Agile/Scrum delivery cycles.

 Capital Markets & Trading Expertise

- Deep understanding of equities, bonds, mutual funds, ETFs, and order types (market, limit, stop).
- Ensure compliance with market regulations, including KYC, AML, CFT, and investor

protection rules.

- Manage securities portfolios, P&L, valuation, and historical data.

👉 Stakeholder & Client Management

- Lead functional workshops with client banks and gather business requirements.
- Bridge the gap between business teams, IT teams, UX/UI teams, and QA teams.

🔧 Quality & Go-Live

- Write user stories and acceptance criteria.
- Validate functional deliverables and monitor product performance (adoption, incidents, client satisfaction).
- Participate in UAT and go-live activities.

🚀 We're Hiring – Scrum Master

📍 Location: Bangalore, India

🧠 Experience: 5–9 Years (Relevant: 5+ Years)

🕒 Availability: Immediate to 30 days

📌 Reporting To: Technical Project Manager

Shared by **Job Curator** - Join us on Telegram: <https://t.me/testingexperiencedopenings>

We are looking for a delivery-focused Scrum Master with a strong understanding of Agile practices to support sprint execution, team coordination, and delivery discipline. This role focuses on enabling high-performing engineering teams while building scalable SaaS products.

We value practical Scrum experience over certification-heavy profiles.

Key Responsibilities

Facilitate Scrum ceremonies: Daily Stand-ups, Sprint Planning, Reviews, and Retrospectives
Coach teams on Agile & Scrum best practices to drive continuous improvement
Remove impediments and blockers impacting sprint delivery
Partner with Product Owners to maintain a healthy backlog and clear user stories
Track sprint metrics (velocity, burndown, capacity) and identify risks early
Promote transparency, accountability, and predictable delivery
Collaborate with Engineering, QA, Product, Design, and DevOps teams
Maintain sprint documentation, reports, and process adherence
Drive adoption of Agile tools and delivery best practices
Ensure alignment with priorities like uptime, scalability, security, and fast releases

Required Skills

5–9 years of experience as a Scrum Master in Agile environments
Strong understanding of Scrum and Kanban frameworks
Experience working with software product teams
Hands-on experience with Jira & Confluence (mandatory)
Strong knowledge of SDLC and modern engineering practices
Excellent communication, facilitation, and conflict-resolution skills
Preferred Skills

Experience with SaaS platforms, CI/CD pipelines, and cloud environments
Exposure to DevOps, SRE, microservices, or API-driven architectures
Knowledge of OKRs, roadmap planning, or product processes
Scrum certifications (CSM / PSM) – good to have
Education

🎓 Bachelor's degree in Computer Science, Engineering, Management, or related field
(Mandatory)

✉ Interested candidates can apply or share their resume for more details.-

nandamath097@gmail.com

Urgent Hiring For Conversational AI Developer- Quality engineer

Designation- Quality Engineer

Role- Permanent/ Full time

Experience- 3+ years

Location- Noida/ Gurgaon/ Pune/ Bangalore

Shift- 12:00 PM to 10:00 PM (10 Hours Shift. Also depends on the project/work dependencies)

Working Days- 5 days

Work Mode- Hybrid

Overview:

We are seeking a skilled Quality Assurance (QA) Engineer with 3–7 years of experience in testing, QA, and reporting within the dynamic fields of Conversational AI and Agentic AI/LLMs. The ideal candidate will be passionate about ensuring the quality of cutting-edge AI systems, with a particular focus on conversational platforms, intelligent agents, and large language models (LLMs).

Mandatory Skills-

Experience into any Manual and Automation testing.

Experience into Conversational AI/ Chatbot.

Experience into either Agentic AI or LLM (any one)

Key Responsibilities:

Develop and execute test cases, scripts, and procedures for both Conversational AI applications and Agentic AI/LLM systems.

Collaborate with product managers, developers, and stakeholders to maintain quality standards throughout the product lifecycle.

Conduct functional, regression, integration, and performance testing on Conversational AI platforms, agentic AI frameworks, and LLM-based solutions.

Identify, document, and track defects using JIRA, providing detailed insights and reports on testing outcomes.

Analyze business and technical requirements to design test strategies tailored to Conversational AI and Agentic AI/LLM use cases.

Evaluate the usability, effectiveness, and scalability of AI-driven applications, offering actionable feedback.

Generate comprehensive test reports and summaries for stakeholders, highlighting key findings and recommendations.

Continuously improve QA methodologies to meet the evolving demands of Conversational AI and Agentic AI technologies.

Required Qualifications:

3–7 years of experience in software testing and quality assurance, with expertise in Conversational AI and Agentic AI/LLMs.

Strong understanding of standard testing practices, methodologies, and tools for AI applications.

Hands-on experience with JIRA for defect tracking and project management.

Proficiency in Excel for data analysis and reporting.

Knowledge of functional and non-functional testing, including performance and security testing.

In-depth familiarity with LLMs, agentic AI systems, and conversational technologies.

Proven ability to work effectively in cross-functional teams within fast-paced environments.

Excellent problem-solving and analytical skills.

Interested candidates may drop their resumes on monika@firstcalli.com
