We're hiring — Business Analyst (Trade Finance & Supply Chain Finance)

 Location: Bangalore | Experience: 9–10 years

Are you passionate about Trade Finance & Supply Chain Finance and experienced in translating complex banking requirements into elegant product solutions? We're looking for a hands-on BA to work with corporate clients, banks, product, and engineering teams to shape digital Trade & SCF solutions.

What you'll do:-

- Partner with corporate clients, bankers and internal stakeholders to capture business needs and pain points.
- Elicit, analyse and document requirements (BRD, FSD, Use Cases); run requirement workshops and GAP analysis.
- Translate business flows into functional/interface specs for development teams; maintain traceability across the lifecycle.
- Create AS-IS/TO-BE process maps, process flow diagrams, screen mockups and use case models.
- Work closely with UI/UX, Dev and QA; support UAT planning, test case reviews and sign-offs.
- Coordinate with technical architects and integration teams for interfaces (Core Banking, SWIFT, Host-to-Host, ERP connectors).

Shared by **Job Curator** - Join us on Telegram: <https://t.me/testingexperiencedopenings>

- Support client demos, walkthroughs and post-implementation reviews.

Must-have domain & skills:-

- Deep knowledge of Trade Finance: Import/Export LCs, BG/SBLC, Bills, Collections, Open Account trade.
- Strong in Supply Chain Finance: Payables/Receivables Finance, Distributor Finance, Factoring, Reverse Factoring.
- Exposure to SWIFT standards (e.g., MT7xx, MT4xx, MT103/MT202, MT798).
- Experience with banking workflows (Maker-Checker, Limit Utilization, Document Handling, Credit Lines).
- Proven experience preparing BRD/FSD, process flows and client-facing workshops.
- Tools: JIRA, Confluence, Visio/[Draw.io/Figma](https://draw.io); Excel & PowerPoint; functional test case writing.

Nice-to-haves:-

- Familiarity with Trade/SCF portals or digital banking platforms.
- Understanding of microservices, REST APIs, JSON/XML, Core Banking integrations.
- Basic SQL or data model knowledge; exposure to frontend/backend stacks (Java Spring Boot, Node.js, React/Angular) a plus.
- Experience leveraging AI tools for productivity is a bonus.

Core soft skills:-

- Strong stakeholder management, presentation & communication skills.
- Analytical mindset, attention to detail, and ability to manage multiple priorities.

If this sounds like you — or if you know someone perfect for this role — please email me at adnan.a@tekitsolution.com . Happy to share more details. Kindly like/share to help us reach relevant candidates. 🙌

🚀 We're Hiring | Storage QA | Bengaluru , Hyderabad 🚀

We're looking for a talented Storage Testing /QA with 2-4 years of experience to join our growing engineering team and work on exciting projects.

🧠 We're looking for: Storage QA Engineer

Experience: 2–4 Years

Location: Hyderabad / Bangalore

Employment Type: Full-Time

Shared by **Job Curator** - Join us on Telegram: <https://t.me/testingexperiencedopenings>

Job Summary

We are looking for a Storage QA Engineer with 2–4 years of experience in testing storage systems and virtualization environments. The ideal candidate should have hands-on exposure to storage protocols, virtualization platforms, and QA methodologies to ensure high-quality, reliable storage solutions.

Key Responsibilities

- Design, develop, and execute test plans, test cases, and test scenarios for storage products and solutions
- Perform functional, system, integration, regression, and performance testing for storage features
- Validate storage functionalities in virtualized environments
- Test and troubleshoot issues related to storage protocols and file systems
- Work closely with development and product teams to understand requirements and ensure test coverage
- Identify, log, track, and verify defects using defect tracking tools
- Automate test cases where applicable and contribute to test framework improvements
- Analyse test results and provide detailed reports on quality metrics

Mandatory Skills

- 2–4 years of experience in Storage QA / Storage Testing
- Strong understanding of storage concepts (SAN, NAS, DAS)
- Hands-on experience with storage protocols such as:
 - iSCSI
 - NFS
 - SMB / CIFS
 - Fibre Channel (FC)
- Experience with virtualization technologies such as:
 - VMware (ESXi, vSphere)
 - KVM / Hyper-V (good to have)
- Knowledge of Linux OS (basic to intermediate level)
- Experience in test documentation and defect tracking

Good to Have

- Exposure to storage arrays, RAID configurations, and snapshots
- Experience with performance and stress testing tools
- Basic scripting knowledge (Python / Shell)
- Understanding of cloud storage concepts (AWS / Azure – nice to have)

Qualifications

- Bachelor's degree in Engineering, Computer Science, IT, or a related field

What We Offer

- Opportunity to work on enterprise-level storage products
- Exposure to advanced virtualization and storage technologies
- Collaborative work environment and career growth opportunities

Urgent Hiring :- QA Engineer – AI and Automation

Location: - Bangalore (Jaynagar)

Budget - Upto 7LPA

Role Overview

As the QA Engineer, you'll ensure the reliability and correctness of the AI stack by developing automated test suites and evaluation frameworks — including using LLMs as judges to assess chatbot accuracy, context retention, and response quality.

Key Responsibilities

- Develop automated test frameworks for the full stack (backend APIs, RAG responses, UI validation).
- Design and maintain datasets for evaluating LLM accuracy and RAG retrieval fidelity.
- Implement automated testing using metrics such as F1 score, BLEU, and LLM-based grading.
- Simulate user interactions and stress test APIs for performance and concurrency.
- Integrate CI/CD pipelines for continuous quality monitoring.

Qualifications

- 3+ years in QA automation, preferably in AI/ML or NLP systems.
- Experience with Python testing frameworks (pytest, unittest).
- Familiarity with REST and WebSocket testing tools (Postman, Locust, k6).
- Understanding of LLM evaluation metrics and prompt-based scoring.
- Nice-to-have: experience with FastAPI and Streamlit testing automation.

Interested candidates can share their CV to: - drishti.tibrewal@nanokernel.net

 We're Hiring | QA Manager 

We're looking for an experienced QA Manager to join our team in Chennai!

- ◆ Experience: 10–15 years
- ◆ Location: Chennai
- ◆ Notice Period: Immediate / 15 days preferred

Key Responsibilities:

Define and own the overall QA strategy across web, mobile, and in-store systems.

Establish QA processes, standards, and best practices for eCommerce delivery.

Align QA strategy with business priorities, release cycles, and peak sale events.

Act as the quality gatekeeper for all releases.

Ensure comprehensive functional and domain testing, including:

Product catalogs and variants (size, color, fit)

Pricing, promotions, discounts, and coupons

Checkout, payments, refunds, and returns

Inventory management, stock synchronization, and order flows

Validate seasonal launches, campaigns, and flash sales.

Select and implement automation tools such as Selenium, Cypress, and Playwright.

Optimize regression suites for frequent Magento releases.

Integrate automated tests into CI/CD pipelines in collaboration with DevOps teams.

Shared by **Job Curator** - Join us on Telegram: <https://t.me/testingexperiencedopenings>

Lead performance testing for high-traffic events and festive sales.
Ensure scalability, stability, and security compliance, including PCI-DSS and data protection standards.
Define QA approaches for AI-driven recommendations, personalized pricing, and promotions.
Validate search relevance, ranking, and personalization accuracy.
Ensure AI-based features meet business and customer experience expectations.
Collaborate closely with Product Owners, Magento Architects, Development, and DevOps teams.
Provide clear quality metrics, risk assessments, and release readiness reports.
Mentor and lead QA teams across multiple projects or streams.

🚀 We're Hiring: Business Analyst – Trade Finance & Supply Chain Finance 🚀

◆ Location: Bangalore, India

◆ Experience: 9-10 Years

◆ Reporting To: Product Head – Trade & Supply Chain Finance

◆ Employment Type: Permanent

◆ Work Mode: Hybrid

We are seeking a highly experienced Business Analyst with deep expertise in Trade Finance and Supply Chain Finance (SCF) to join our team! If you have a strong understanding of Trade Finance products, SCF solutions, and can bridge the gap between business

stakeholders, clients, and technical teams, we want you on board!

Key Responsibilities:

-  **Business Requirements:** Elicit, analyze, and document business requirements in BRD/FSD formats. Conduct requirement workshops, GAP analysis, and process mapping (AS-IS / TO-BE).
-  **Client Interaction:** Interact with corporate clients, business users, and banks to understand business processes and pain points.
-  **Solution Design & Support:** Work closely with UI/UX, development, and QA teams to ensure alignment of solution design with business needs.
-  **UAT Planning:** Participate in UAT planning, test case reviews, and sign-offs.
-  **Integration Coordination:** Collaborate with technical architects and integration teams for Trade & SCF system interfaces (Core Banking, SWIFT, ERP connectors).
-  **Documentation:** Maintain traceability matrix and ensure end-to-end requirement coverage throughout the lifecycle.
-  **Post-Implementation:** Support client demos, product walkthroughs, and post-implementation reviews.

Mandatory Requirements:

-  **Domain Expertise:**
 - Strong working knowledge of Trade Finance products (LCs, BGs/SBLCs, Bills, Collections, etc.)
 - Hands-on experience with Supply Chain Finance products (Payables Finance, Receivables Finance, Factoring, Reverse Factoring, etc.)
 - Exposure to SWIFT message standards (MT7xx/MT4xx/MT103/MT202).
 - Familiarity with banking workflows like Maker-Checker, Limit Utilization, and Credit Lines.

Business Analysis Skills:

- Proven experience in preparing BRD, FSD, Use Case Documents, and Process Flow Diagrams
- Experience in client-facing roles, conducting requirement workshops, and product walkthroughs
- Strong understanding of the end-to-end Trade & SCF transaction lifecycle.

Tools & Methodologies:

- Proficiency in JIRA, Confluence, Visio, [Draw.io](https://draw.io), FIGMA, and Excel/PowerPoint
- Great to have knowledge of AI tools like Replit, Bolt, Lovable, etc.

Interested? Apply Now!

 Exciting Opportunity for Automation Test Engineers | Bangalore (Onsite) 

One of our reputed clients—a leading technology company building high-performance, real-time software systems with a strong focus on low-latency infrastructure—is looking to onboard a skilled Automation Test Engineer.

If you're passionate about automation, quality engineering, and working on cutting-edge

Shared by **Job Curator** - Join us on Telegram: <https://t.me/testingexperiencedopenings>

platforms in Blockchain and AdTech, this could be a great next step in your career.

-  Location: Bangalore (Onsite)
-  Experience: 2–5 years

 What you'll work on:

- * Building and maintaining robust automation frameworks (UI, API, performance).
- * Writing and executing automated tests using tools like Selenium, Cypress, Playwright.
- * Collaborating closely with developers and product teams.
- * Integrating automation into CI/CD pipelines.
- * Driving quality improvements in fast-paced, Agile environments.

 Ideal fit if you have:

- * Strong automation testing experience.
- * Solid coding skills (Java / Python / JavaScript).
- * Experience with APIs, CI/CD, and modern QA practices.
- * Domain exposure to Blockchain and AdTech.

 We're Hiring: Product Owner – Online Trading 

- ◆ Location: Bangalore, India
- ◆ Experience: 10-12 Years
- ◆ Employment Type: Permanent
- ◆ Work Mode: Hybrid

 Apply Now: Send your resume to meharaj@krishpar.com

Looking for an experienced Product Owner to drive the design, evolution, and performance of digital brokerage platforms for both retail and corporate clients. If you have deep expertise in trading products, a strategic mindset, and strong leadership in Agile/Scrum delivery, we want you on our team!

Key Responsibilities:

 Product Strategy & Roadmap

- Define the product vision for online trading platforms (web & mobile).
- Build and manage the product roadmap aligned with Adria B&T and client banks' strategies.
- Prioritize the product backlog and lead Agile/Scrum delivery cycles.

 Capital Markets & Trading Expertise

- Deep understanding of equities, bonds, mutual funds, ETFs, and order types (market, limit, stop).
- Ensure compliance with market regulations, including KYC, AML, CFT, and investor protection rules.
- Manage securities portfolios, P&L, valuation, and historical data.

 Stakeholder & Client Management

Shared by **Job Curator** - Join us on Telegram: <https://t.me/testingexperiencedopenings>

- Lead functional workshops with client banks and gather business requirements.
- Bridge the gap between business teams, IT teams, UX/UI teams, and QA teams.
- 🔧 Quality & Go-Live
- Write user stories and acceptance criteria.
- Validate functional deliverables and monitor product performance (adoption, incidents, client satisfaction).
- Participate in UAT and go-live activities.

🚀 We're Hiring – Scrum Master

📍 Location: Bangalore, India

🧠 Experience: 5–9 Years (Relevant: 5+ Years)

⌚ Availability: Immediate to 30 days

📌 Reporting To: Technical Project Manager

We are looking for a delivery-focused Scrum Master with a strong understanding of Agile practices to support sprint execution, team coordination, and delivery discipline. This role focuses on enabling high-performing engineering teams while building scalable SaaS products.

We value practical Scrum experience over certification-heavy profiles.

Key Responsibilities

Facilitate Scrum ceremonies: Daily Stand-ups, Sprint Planning, Reviews, and Retrospectives

Coach teams on Agile & Scrum best practices to drive continuous improvement

Remove impediments and blockers impacting sprint delivery

Partner with Product Owners to maintain a healthy backlog and clear user stories

Track sprint metrics (velocity, burndown, capacity) and identify risks early

Shared by **Job Curator** - Join us on Telegram: <https://t.me/testingexperiencedopenings>

Promote transparency, accountability, and predictable delivery
Collaborate with Engineering, QA, Product, Design, and DevOps teams
Maintain sprint documentation, reports, and process adherence
Drive adoption of Agile tools and delivery best practices
Ensure alignment with priorities like uptime, scalability, security, and fast releases

Required Skills

5–9 years of experience as a Scrum Master in Agile environments

Strong understanding of Scrum and Kanban frameworks

Experience working with software product teams

Hands-on experience with Jira & Confluence (mandatory)

Strong knowledge of SDLC and modern engineering practices

Excellent communication, facilitation, and conflict-resolution skills

Preferred Skills

Experience with SaaS platforms, CI/CD pipelines, and cloud environments

Exposure to DevOps, SRE, microservices, or API-driven architectures

Knowledge of OKRs, roadmap planning, or product processes

Scrum certifications (CSM / PSM) – good to have

Education

🎓 Bachelor's degree in Computer Science, Engineering, Management, or related field
(Mandatory)

✉ Interested candidates can apply or share their resume for more details.-
nandamath097@gmail.com

=====

We're hiring Software QA Engineers (Aerospace Domain) for our Bangalore location. If you're exploring new opportunities, share your updated resume at nancy@suitable.ai or DM me.

#Qentelli is hiring

We are seeking an experienced QA Automation Engineer

Apply Now: Share your application in the below link or you can send your resume to
priyanka.perla@qentelli.com

Job Summary

We are looking for a skilled QA Engineer with strong experience in C# and Selenium to join our Quality Assurance team. The ideal candidate will be responsible for designing test scenarios, building automation scripts, executing tests, identifying defects, and ensuring high-quality software delivery

Roles and Responsibilities

Develop, maintain, and enhance automation frameworks using C# and Selenium WebDriver.

Write clean, reusable, and efficient test scripts for web and API-based applications.

Perform Functional, Regression, Integration, API, and UI testing.

Analyze requirements and prepare detailed test plans, test cases, and test scripts.

Execute automation and manual tests and document results clearly.

Identify, log, and track defects using tools like JIRA, Azure DevOps, or similar.

Required Skills and Qualifications

4 - 7 Years of hands-on experience in QA / Test Automation

Strong programming skills in C# with solid experience in Selenium WebDriver.

Strong understanding of OOP concepts and automation best practices.

Experience with NUnit / MSTest / xUnit frameworks.

Good knowledge of API testing (Postman, REST Assured in C#, or equivalent)

Preferred Skills

Knowledge of API testing (RestAssured, Postman, Karate, or similar) to validate mobile backend services.

Knowledge of mobile security testing and compliance best practices.

Experience with mobile performance testing & monitoring (Firebase Performance, Crashlytics, Xcode Instruments, Android Profiler).

Exposure to cloud platforms (AWS, GCP, Azure) for mobile app deployments.

=====

I am **#hiring** for QA Interns who want real hands-on exposure to automation and performance testing on live, scalable products, not just test cases on paper.

If you're someone who enjoys finding edge cases, writing automation scripts, and understanding how systems behave under load, you'll fit right in.

Role: QA Intern
Location: Hyderabad
Type: Full-time
Timings: 2:00 PM – 11:00 PM IST
Experience: 3-6 months of prior internship experience

What makes this role exciting:

Work on UI automation using Cypress or Playwright
Run real performance and load tests using JMeter
Test APIs that power real-world applications
Integrate automation into CI/CD pipelines
Collaborate directly with developers and product teams
Learn how quality is maintained at scale

You'll stand out if you have:

Hands-on experience with Cypress/Playwright + JavaScript
Understanding of DOM, async behavior, and browser internals
Exposure to JMeter and performance metrics
API testing and CI/CD familiarity
Strong analytical and problem-solving mindset

If you want your QA career to start with real impact and real learning, this is your opportunity.

Submit your video resume for the screening process here: <https://lnkd.in/gMS5dytY>

🔴 Hiring | Senior QA Engineer (Automation Focus)

📍 Location: Hyderabad, India

📅 Work Week: Sunday – Thursday

✈️ International Travel: As required

◆ Role Overview:

We are looking for a Senior QA Engineer with strong expertise in automation testing, test frameworks, and CI/CD integration. The ideal candidate will ensure high product quality across web, mobile, and API platforms in a fast-paced SaaS environment.

🔧 Key Responsibilities:

Design and implement automation frameworks for web, mobile & API testing
Build and maintain automated regression, integration & performance test suites
Integrate automated tests into CI/CD pipelines for reliable releases
Mentor junior QA engineers and define QA automation best practices
Collaborate with Product, Engineering & DevOps teams across the SDLC
Analyze test results and recommend quality improvements

🎯 Required Skills & Experience:

5+ years of QA experience with 3+ years in automation
Expertise in Cypress, Playwright, Selenium, Appium
Strong programming/scripting skills (JavaScript, Python, or Java)
Experience building automation frameworks from scratch
Hands-on experience with CI/CD tools (Jenkins, GitHub Actions, GitLab CI)
Excellent problem-solving, leadership & communication skills

★ Nice-to-Have:

Performance testing (JMeter, k6) or security testing experience
Knowledge of Docker & Kubernetes
Cloud exposure: AWS / GCP / Azure

📧 Interested candidates can share their updated resumes at:

We're Hiring | SDET – Functional & Automation Test Engineer (Playwright)

Role: SDET (Functional & Automation Test Engineer – Playwright)

Employment Type: Full Time

Experience: 4 – 6 Years

CTC: ₹16 – 24 LPA

Location: Hyderabad

Work Mode: Hybrid / WFO

Notice Period: Immediate to 15 Days

Role Overview

We are looking for a skilled SDET with strong experience in Playwright-based automation and solid functional testing knowledge. The role involves building and maintaining automation frameworks, executing end-to-end testing, and collaborating closely with engineering teams in an Agile environment.

Must-Have Skills

- ✓ 4–6 years of experience in manual & automation testing
- ✓ Strong hands-on experience with Playwright (mandatory)
- ✓ Excellent understanding of functional, regression, smoke & integration testing
- ✓ Experience with automation frameworks using Python (Pytest or similar)
- ✓ API testing experience using Postman / RestAssured
- ✓ Strong debugging, analytical, and problem-solving skills
- ✓ Familiarity with Agile / Scrum methodologies
- ✓ Exposure to AI testing, including validation of AI-driven features and model outputs

Good to Have

- ✚ Exposure to MCP (Model Context Protocol) or similar frameworks
- ✚ Experience with Slack, Okta, SFDC permission models & integrations
- ✚ Cloud experience (AWS / GCP / Azure)
- ✚ Knowledge of Docker, Kubernetes
- ✚ Experience with JIRA, TestRail, Zephyr or similar test management tools

Key Responsibilities

Perform functional testing of new features, enhancements, and bug fixes
Design, develop, and maintain Playwright automation frameworks using Python
Automate regression, functional, and integration test cases
Collaborate with developers, product owners, and QA teams to identify test scenarios
Integrate automated tests into CI/CD pipelines (Jenkins, GitHub Actions, etc.)
Debug, analyze, and report defects; ensure timely resolution
Maintain test documentation, test data, and test coverage metrics
Conduct manual/exploratory testing where automation is not feasible

Office Timing: 10:00 PM – 7:00 AM

Sails Software Inc is Hiring

- 🔥 We're Hiring: SDET (Manual + Automation) | 5+ Years Experience
- 📍 Visakhapatnam / Hyderabad (Hybrid)
- 👤 Full-Time Opportunity

Are you someone who breaks things for a living — and loves every second of it? 😎😎

We're looking for a sharp, detail-obsessed SDET who can combine solid manual testing instincts with powerful automation skills to help us ship high-quality, reliable products at scale.

If testing for you is not just a phase in the SDLC but a craft, keep reading 📌

🚀 What You'll Be Doing

- ◆ Test Strategy & Execution
Design comprehensive test plans, test cases, and smart test data strategies for complex applications.
- ◆ Automation Engineering
Develop, design, and configure automation solutions for efficient and scalable test execution.
- ◆ Manual + Automated Testing
Own both worlds — exploratory, functional, regression, and automated test coverage.
- ◆ Backend & API Validation
Write SQL queries to validate API outputs and ensure accurate backend data.
- ◆ Framework Development
Build and maintain robust, reusable automation frameworks using Python (Pytest / unittest and related tech)
- ◆ CI/CD Integration
Optimize pipelines for continuous testing and fast feedback loops.
- ◆ Performance & Scalability Testing
Identify bottlenecks and ensure the system performs under pressure.
- ◆ Defect Analysis
Lead root cause investigations and collaborate closely with dev teams to drive fixes.

✅ Must-Have Skills

- ✓ Strong Manual Testing foundation
- ✓ Automation with Playwright (5–7 years)
- ✓ Experience in GCP migration testing
- ✓ Strong in DB / field-level validations

🎯 What Makes You a Great Fit

- ✨ 5+ years in software testing & automation
- ✨ Strong in API testing + SQL for backend validation
- ✨ Hands-on with Playwright

Shared by **Job Curator** - Join us on Telegram: <https://t.me/testingexperiencedopenings>

- ✨ Deep understanding of CI/CD pipelines
- ✨ Experience in Performance & Scalability Testing
- ✨ Comfortable working in Agile/Scrum environments

💡 The Role in a Nutshell

As a QA Manual & Automation Tester (SDET), you'll play a key role in product quality — from designing test strategies to executing exploratory, functional, regression, and automated testing. You'll collaborate closely with Dev, Product, and Support teams to make sure every release is solid, stable, and customer ready.

✉️ Know someone perfect for this? Tag them or share this post! and if you are someone who is interested then please share your profile to jessicapriya.yelle@sailssoftware.com

Role – SDET (Functional & Automation Test Engineer – Playwright)

Exp –3–6 years

Mode of interview - F2F Discussion

Location – Hyderabad

Work Mode – Hybrid/WFO

Notice – Up to 15 Days

Job Description: SDET (Functional & Automation Test Engineer – Playwright)

Role Overview:

We are looking for a skilled Software Development Engineer in Test (SDET) with strong expertise in Playwright with Typescript/Python. The candidate will be responsible for functional testing and test automation of AI-enabled features and workflow automation platforms, ensuring end-to-end quality, reliability, and accuracy of product delivery.

Key Responsibilities

- Perform functional testing of new features, enhancements, and bug fixes.
- Design, develop, and maintain automation frameworks using Playwright with Python.
- Automate regression, functional, and integration test cases.
- Collaborate closely with developers, product owners, and QA teams to understand requirements and identify test scenarios.
- Integrate automated tests into CI/CD pipelines (e.g., Jenkins, GitHub Actions).
- Debug, analyze, and report test failures, ensuring timely defect resolution.
- Maintain test documentation, test data, and provide test coverage metrics.
- Conduct exploratory/manual testing in areas where automation is not feasible.

Required Skills & Experience

- 3–6 years of experience in software testing (both manual & automation).
- Strong hands-on experience with Playwright (mandatory)
- Solid understanding of testing concepts (functional, regression, smoke, integration).
- Understanding of workflow automation and integration platforms.
- Knowledge of test frameworks (Pytest or similar).
- Experience with API testing (Postman/RestAssured).
- Familiarity with Agile/Scrum practices.
- Exposure to AI testing methodologies and tools, including testing AI-driven features, validating model outputs, and ensuring reliability and accuracy.
- Strong debugging and analytical skills.

Good to Have

- Prior exposure to MCP (Model Context Protocol) or similar integration frameworks.
- Exposure to Slack, Okta, SFDC permission models and related system integrations.
- Experience with cloud platforms (AWS, GCP, or Azure).
- Knowledge of containerization (Docker, Kubernetes).
- Experience with test management tools like JIRA, TestRail, or Zephyr.

#We're Hiring | Technical Project Manager / Scrum Master

Location: Hyderabad

Engagement: Full-Time / Contract

Joining: Immediate Joiners Preferred

We are looking for an experienced Technical Project Manager / Scrum Master to own end-to-end delivery of technology-driven projects and work closely with cross-functional engineering teams.

◆ Key Responsibilities:

- Own end-to-end project delivery (scope, timelines, quality, risks)
- Act as Scrum Master and facilitate Agile ceremonies
- Work hands-on with Frontend, Backend, QA, and DevOps teams
- Translate business requirements into user stories and sprint goals
- Track sprint metrics (velocity, burndown, capacity)
- Manage dependencies, risks, and stakeholder communication
- Support release planning, deployments, and retrospectives
- Drive continuous improvement in Agile and delivery processes

◆ Qualifications:

- 12+ years of experience as a Technical Project Manager / Scrum Master
- Strong understanding of web application architectures and APIs
- Proven experience working closely with engineering teams
- Deep knowledge of Agile/Scrum and SDLC best practices
- Excellent stakeholder management and communication skills

Shared by **Job Curator** - Join us on Telegram: <https://t.me/testingexperiencedopenings>

- Hands-on experience with Jira, Azure DevOps, Confluence, or similar tools

◆ Nice to Have:

- Prior technical background (Developer / Tech Lead)
- Experience with Angular / React / Node / .NET applications
- Exposure to Cloud platforms (Azure / AWS) and CI/CD pipelines

✉ Interested candidates or referrals — please share your updated resume or connect with me directly.

At [NewVision Software](#), we are hiring a Senior AI Test Engineer — and this is NOT a traditional QA role 😊

📍 Hybrid role | Hyderabad or Bangalore | Only Hyderabad or Bangalore based candidates must apply

This role is for engineers who already test AI systems in production — not just UI flows or REST APIs.

You'll be validating LLM behavior, RAG accuracy, agent reasoning, safety risks, and performance across real-world AI workflows.

What you'll work on:

1. Designing AI test strategies for LLMs, agents, and orchestration workflows
2. Creating golden datasets, prompt test cases, and evaluation frameworks
3. Running regression tests across prompt changes, agent logic, and model upgrades
4. Measuring accuracy, consistency, latency, throughput, and cost efficiency
5. Red-team testing for safety, compliance, and prompt-injection risks
6. Embedding AI test suites into CI/CD pipelines with automated quality gates

This role expects hands-on experience with:

1. Python, Pytest, AI evaluation frameworks (e.g. LangSmith / DeepEval / TruLens etc.)
2. LLM / RAG testing and dataset curation
3. Azure AI / Azure OpenAI
4. CI/CD pipelines (GitHub Actions)
5. Selenium / Playwright as part of a broader automation stack

Overall experience expectations:

7+ years in QA / test automation, with ~2 years of hands-on experience testing AI / LLM-based systems in production environments.

Job Title: Senior QA Engineer (Salesforce)

Location: Hyderabad

Job Type: Contract

About Us:

We're seeking a highly experienced Senior QA Engineer with strong Salesforce expertise to lead our quality assurance efforts. As a Senior QA Engineer, you will be responsible for ensuring the quality and reliability of our Salesforce applications.

Responsibilities:

- Lead the development and execution of comprehensive test plans, test cases, and test scripts to identify bugs and issues in Salesforce applications
- Collaborate with cross-functional teams, including development, business analysis, and stakeholders to understand requirements and ensure quality standards are met
- Identify, document, and track defects, and collaborate with developers to resolve them
- Design and implement automated testing frameworks using tools like Selenium, Provar, or TestNG
- Conduct regression testing to ensure changes don't disrupt existing functionality
- Mentor junior team members and provide guidance on testing best practices

Requirements:

- 8+ years of experience in QA with strong Salesforce experience (Sales Cloud, Service Cloud, Lightning)
- Proven expertise in test automation tools like Selenium, Provar, or TestNG
- Strong understanding of Salesforce data models, workflows, and integrations
- Excellent analytical and problem-solving skills
- Strong communication and collaboration skills
- Experience with Agile development methodologies (Scrum/Kanban)

Nice to Have:

- Salesforce certifications (e.g., Certified Administrator, Platform Developer)
- Experience with CI/CD pipelines (e.g., Jenkins, Azure DevOps)
- Knowledge of cloud-based technologies and architectures

🚀 We're Hiring | SDET (Mobile & Automation)

📍 Location: Hyderabad (Onsite)

👤 Experience: 3–5 Years

🕒 Notice Period: Immediate Joiners Only

🔧 Skills & Tools

- * Python, Flutter, C, HTML, CSS, JavaScript
- * Appium, Selenium, Postman, Docker
- * PyTest, XCTest, Allure Reports
- * Mobile Automation, API Automation
- * iOS App Testing, Smoke & Regression Testing
- * Generative AI, OpenAI API

📱 This project focuses on iOS & Android mobile applications that integrate with smart safety devices such as smoke detectors, carbon monoxide alarms, and IAQ sensors—delivering real-time alerts, device health monitoring, and voice assistant integration with smart devices.

👤 Roles & Responsibilities

- Develop and maintain end-to-end mobile automation for iOS & Android using Appium (Python)
- Automate testing for device onboarding, IAQ events, OTA updates
- Validate Alexa & Google Home integrations, including localized responses (English & French)
- Build reusable automation frameworks handling dynamic UI, permissions, and platform-specific flows
- Execute manual, smoke, and regression testing across releases
- Collaborate with cloud, firmware, and product teams for seamless device-app-cloud integration
- Track defects in Jira and generate detailed reports using Allure

✨ If you're passionate about mobile automation and smart device ecosystems, this role is for you!

🚀 We're Hiring | Salesforce Business Analyst (Insurance Domain)

📍 Location: Hyderabad

👤 Experience: 5+ Years

🕒 Employment Type: Full-time

We are seeking an experienced Salesforce Business Analyst with strong insurance domain

Shared by **Job Curator** - Join us on Telegram: <https://t.me/testingexperiencedopenings>

expertise and deep knowledge of Salesforce implementations and integrations. This role plays a critical part in translating complex business needs into scalable Salesforce solutions while ensuring regulatory compliance and seamless system integrations across insurance platforms.

You will act as a key bridge between business stakeholders and technical teams, driving process optimization, operational efficiency, and measurable business value.

 Required Qualifications:

- 5+ years of experience as a Salesforce Business Analyst
- Strong insurance domain knowledge (Policy, Claims, Underwriting, Compliance)
- Hands-on experience with Sales Cloud, Service Cloud, and custom objects
- Deep understanding of Salesforce integrations, APIs, and middleware
- Expertise in functional documentation, user stories, and UAT management
- Experience with post-deployment support
- Familiarity with Salesforce Flow, Validation Rules, Process Builder
- Knowledge of insurance data governance and regulatory compliance

 Key Responsibilities:

- Business Analysis & Requirement Gathering
- Engage with stakeholders across Sales, Service, Underwriting, Claims, Policy Administration, and Actuarial teams
- Conduct workshops, interviews, and process-mapping sessions to document current and future-state workflows
- Perform gap analysis between business processes and system capabilities
- Translate requirements into functional specifications, user stories, and acceptance criteria
- Maintain end-to-end requirements traceability and documentation standards
- Salesforce Solution Expertise
- Design and maintain reports, dashboards, and analytics for Sales, Service, Underwriting, and Claims
- Collaborate with Salesforce Admins and Developers to design scalable solutions
- Configure Salesforce components including:
 - Objects, Fields, Record Types
 - Page Layouts, Lightning App Builder
 - Validation Rules, Flows
- Support QA and UAT teams with functional testing and validation

 We're Hiring | Storage QA | Bengaluru , Hyderabad 

We're looking for a talented Storage Testing /QA with 2-4 years of experience to join our growing engineering team and work on exciting projects.

 We're looking for: Storage QA Engineer

Experience: 2–4 Years

Location: Hyderabad / Bangalore

Employment Type: Full-Time

Job Summary

We are looking for a Storage QA Engineer with 2–4 years of experience in testing storage systems and virtualization environments. The ideal candidate should have hands-on exposure to storage protocols, virtualization platforms, and QA methodologies to ensure high-quality, reliable storage solutions.

Key Responsibilities

Design, develop, and execute test plans, test cases, and test scenarios for storage products and solutions

Perform functional, system, integration, regression, and performance testing for storage features

Validate storage functionalities in virtualized environments

Test and troubleshoot issues related to storage protocols and file systems

Work closely with development and product teams to understand requirements and ensure test coverage

Identify, log, track, and verify defects using defect tracking tools

Automate test cases where applicable and contribute to test framework improvements

Analyse test results and provide detailed reports on quality metrics

Mandatory Skills

2–4 years of experience in Storage QA / Storage Testing

Strong understanding of storage concepts (SAN, NAS, DAS)

Hands-on experience with storage protocols such as:

iSCSI

NFS

SMB / CIFS

Fibre Channel (FC)

Experience with virtualization technologies such as:

VMware (ESXi, vSphere)

KVM / Hyper-V (good to have)

Knowledge of Linux OS (basic to intermediate level)

Experience in test documentation and defect tracking

Good to Have

Exposure to storage arrays, RAID configurations, and snapshots

Shared by **Job Curator** - Join us on Telegram: <https://t.me/testingexperiencedopenings>

Experience with performance and stress testing tools
Basic scripting knowledge (Python / Shell)
Understanding of cloud storage concepts (AWS / Azure – nice to have)

Qualifications

Bachelor's degree in Engineering, Computer Science, IT, or a related field

What We Offer

Opportunity to work on enterprise-level storage products
Exposure to advanced virtualization and storage technologies
Collaborative work environment and career growth opportunities

Hiring: Senior QA Engineer (Manual Testing + Business Analysis)

Location: Hyderabad

Experience: 3–5 Years

We are looking for a senior-minded QA professional who goes beyond execution and plays a critical role in shaping product quality through deep business understanding. This role sits at the intersection of quality, business, and engineering.

Role Overview:

As a Senior QA Engineer, you will be responsible for owning quality from a business perspective, not just validating features. You will be expected to independently interpret requirements, challenge assumptions, and ensure the product behaves as intended in real-world business scenarios.

Key Responsibilities:

Own manual testing strategy and execution end-to-end

Independently analyze business and product requirements without relying solely on developer inputs

Translate complex business logic into high-impact test scenarios and edge cases

Identify gaps in requirements and raise concerns before development or release

Produce clear, structured defect reports and work closely with engineering teams to drive resolution

Act as a quality gatekeeper, ensuring features meet both functional and business expectations

Collaborate closely with product, business, and engineering stakeholders

What We're Looking For:

3–5 years of experience in manual QA, preferably in product-driven environments

Engineering background strongly preferred

Demonstrated exposure to Business Analysis, requirement interpretation, or product workflows

Strong ability to understand and question business logic and edge cases

Excellent communication skills and stakeholder management capability

Comfortable taking ownership and influencing decisions around quality

Shared by **Job Curator** - Join us on Telegram: <https://t.me/testingexperiencedopenings>

Important Context:

This is not a checklist-based testing role

The ideal candidate understands business requirements more deeply than developers, and tests accordingly

Interested candidates may apply sonika@zenithcad.com or reach out directly with their resume.

This is a high-impact, high-ownership role for professionals who take pride in building reliable, business-critical software.

=====

We're excited to share that we have multiple Senior Business Analyst – Payments roles open across Bangalore, Chennai, and Hyderabad! 🚀

If you have strong experience in payments platforms, QA validation, E2E delivery, SWIFT/ISO20022, Canada Lynx, Fedwire, Shift-Left testing, Jira/JTMF, and Agile, I'd love to connect.

We're looking for professionals who can translate complex payment requirements into clear deliverables, manage cross-functional coordination, and ensure regulatory-compliant, high-quality releases across complex payment ecosystems.

 Automation Test Engineer – AI/ML (Enterprise QA)

 Location- Hyderabad (Hybrid)

 Experience- 6+ years

We are looking for an Automation Test Engineer with AI/ML exposure to drive enterprise-grade quality across large-scale cloud and digital platforms.

Responsibilities:

-  Design and maintain automation frameworks (Java/Python)
-  Build automated test suites across multiple testing types
-  Experience with AWS Bedrock is mandatory
-  Validate AI/ML models, data quality & accuracy
-  Define test strategies with cross-functional teams
-  Embed automated testing into CI/CD pipelines
-  Ensure best practices, documentation, and code quality

Requirements:

-  Strong experience in Automation testing
-  Knowledge of DevOps & cloud-native testing
-  Enterprise QA mindset

devashish.goswami@zyoin.com

=====

AI-Driven Automation Test Engineer (Next-Gen Quality Engineering)

Location: Hyderabad | Hybrid

Experience: 6+ years

Industry: Digital Transformation | Cloud | DevOps | AI-Driven QA

We're hiring an Automation Test Engineer (AI/ML) to build intelligent, scalable test solutions for Fortune 500 digital transformation programs.

What you'll do:

- ▶ Build automation frameworks using Python and/or Java
- ▶ Experience with AWS Bedrock is mandatory
- ▶ Create automated tests for functional, regression, integration & performance
- ▶ Test and validate AI/ML models, datasets, accuracy & edge cases
- ▶ Implement AI-assisted testing tools
- ▶ Integrate automation into CI/CD pipelines
- ▶ Collaborate with product, DevOps, and engineering teams

Ideal profile:

- ▶ Strong automation testing background
- ▶ Exposure to AI/ML testing
- ▶ Experience with Cloud & DevOps environments

Job Title: QA Tester

Experience Required: 1-2 Years

Location: Noida (On-site)

Joining: Immediate

Shared by **Job Curator** - Join us on Telegram: <https://t.me/testingexperiencedopenings>

Job Description:

We are looking for a detail-oriented Manual Tester to join our team. The ideal candidate should have a strong understanding of software testing principles and the ability to identify and report bugs effectively.

Key Responsibilities:

- Perform manual testing of web and mobile applications.
- Create, execute, and maintain test cases and test scenarios based on requirements.
- Identify, document, and report bugs using a bug-tracking system.
- Conduct functional, regression, usability, and exploratory testing.
- Collaborate with developers and product teams to understand requirements and ensure quality.
- Participate in test planning and provide feedback on product quality.
- Ensure test coverage and maintain proper documentation of test results.

Required Skills & Qualifications:

- 2 years of experience in manual testing.
- Understanding of SDLC (Software Development Life Cycle) and STLC (Software Testing Life Cycle).
- Familiarity with different types of testing like functional, regression, integration, and usability testing.
- Experience with bug-tracking tools such as JIRA, Bugzilla, or Trello.
- Ability to write clear and detailed test cases, test reports, and defect reports.
- Basic knowledge of SQL queries for data validation (preferred).
- Strong analytical and problem-solving skills.
- Good communication and teamwork skills.

Nice to Have:

- Exposure to API testing using Postman.
- Basic understanding of automation testing concepts.

Why Join Us?

- Opportunity to work on exciting projects with a collaborative team.
- Career growth and training opportunities.
- A positive and learning-oriented work environment.
- If you are passionate about ensuring software quality and have a keen eye for detail, we'd love to hear from you.

Interested candidate can apply by sending their resume to career@kulsys.com or naincv.goel@kulsys.com

Key Responsibilities:

Develop and execute test cases, scripts, and procedures for both Conversational AI applications and Agentic AI/LLM systems.

Collaborate with product managers, developers, and stakeholders to maintain quality standards throughout the product lifecycle.

Conduct functional, regression, integration, and performance testing on Conversational AI platforms, agentic AI frameworks, and LLM-based solutions.

Identify, document, and track defects using JIRA, providing detailed insights and reports on testing outcomes.

Shared by **Job Curator** - Join us on Telegram: <https://t.me/testingexperiencedopenings>

Analyze business and technical requirements to design test strategies tailored to Conversational AI and Agentic AI/LLM use cases.
Evaluate the usability, effectiveness, and scalability of AI-driven applications, offering actionable feedback.
Generate comprehensive test reports and summaries for stakeholders, highlighting key findings and recommendations.
Continuously improve QA methodologies to meet the evolving demands of Conversational AI and Agentic AI technologies.

Required Qualifications:

3–7 years of experience in software testing and quality assurance, with expertise in Conversational AI and Agentic AI/LLMs.
Strong understanding of standard testing practices, methodologies, and tools for AI applications.
Hands-on experience with JIRA for defect tracking and project management.
Proficiency in Excel for data analysis and reporting.
Knowledge of functional and non-functional testing, including performance and security testing.
In-depth familiarity with LLMs, agentic AI systems, and conversational technologies.
Proven ability to work effectively in cross-functional teams within fast-paced environments.
Excellent problem-solving and analytical skills.

#hiring c2c & w2

Position:: AI Penetration Tester

Location:: Remote (USA)

Please share resume at laika@yptllc.com

AI Penetration Tester

- Execute AI-focused penetration testing engagements that include manual penetration testing of systems incorporating AI/ML, objective-based testing of AI-driven features, and coverage of both traditional and AI-centric attack surfaces.
- Perform threat modeling for AI-powered software systems, evaluate AI-related business logic, and conduct architecture reviews. Focus on adversarial ML vectors, prompt-based vulnerabilities, and other AI-specific security risks.
- Develop and improve AI-driven tools and methodologies for offensive security tasks such as discovery, exploitation, fuzzing, and adversarial ML testing, emphasizing web apps, APIs, and mobile clients.
- Demonstrate AI penetration testing findings to technical and non-technical audiences, including live demos.
- Act independently on AI penetration testing with minimal oversight, guiding engagements from planning through execution and reporting.

Qualifications: The skills, abilities, specific knowledge, education, and minimum experience necessary to perform this job.

- Minimum three (3) years of recent penetration testing experience focused on APIs, web applications, and mobile applications. Experience with AI model testing or AI security is highly desirable.
- Proven background in AI red teaming and adversarial attack development, including prompt engineering attacks, LLM-based vulnerability analysis, and model evasion techniques.
- Proficiency with penetration testing tools (e.g., Burp Suite Pro, Netsparker, Checkmarx) and AI security frameworks (e.g., TensorFlow, PyTorch, LLM APIs, LangChain).
- One or more major ethical hacking certifications (e.g., GWAPT, CREST, OSWE, OSHA) and certifications or training in AI security techniques.

Position: UiPath Solution Architect
Location: Remote

Role Overview

We're looking for a hands-on UiPath Solution Architect who can design and build enterprise-scale automations, not just review designs. You'll stay close to the code for complex workflows while also shaping architecture, standards, and AI adoption across the automation landscape.

This role works closely with business stakeholders, Developers, security teams, and the RPA CoE to ensure solutions are feasible, secure, scalable, and aligned with enterprise standards.

Key Responsibilities

Design end-to-end automation solutions using the UiPath platform
Work directly with business stakeholders to translate requirements into technical and automation feasibility
Lead solution design, complexity assessment, and effort estimation
Remain hands-on for complex automations, POCs, and AI-enabled workflows
Build and govern automations using UiPath Studio and REFramework
Own and guide usage of UiPath products including:
Orchestrator (queues, assets, triggers)
UiPath Apps
UiPath Maestro (process orchestration)
Document Understanding, AI Center, Action Center
Design AI-enabled automations (IDP, OCR, LLM integration)
Perform architecture and code reviews; mentor development teams
Partner with Security and Risk teams for architecture and security reviews

Shared by **Job Curator** - Join us on Telegram: <https://t.me/testingexperiencedopenings>

Ensure solutions align with RPA CoE standards, governance, and design guidelines
Use Jira to manage automation backlogs, track delivery, support sprint planning, and provide visibility into progress
Support production stability, performance tuning, and issue resolution
Required Skills & Experience

Strong hands-on experience with UiPath Studio, Orchestrator, Apps, and Maestro and 5 Plus experience in Architect role
Proven experience designing enterprise-scale automation architectures
Good Hands on experience on AI, Document Understanding, and API and LLM integration
Strong programming skills (C#, [VB.NET](#); Python is a plus)
Experience with APIs, databases, and enterprise system integrations
Experience working in Agile teams, using Jira for backlog management and delivery tracking
Familiarity with GIT CI/CD, version control, and release management
Ability to clearly explain technical solutions to business stakeholders
Experience working in or with an RPA Center of Excellence (CoE)
Mandatory Requirement

UiPath Certification is required
UiPath Certified Solution Architect (preferred), or
UiPath Certified Advanced RPA Developer

Please share resume at Anusha@americanunit.com

Senior QA Advisor – Salesforce Testing (Contract / Freelance)

We are building AURA, an AI-assisted QA automation platform, and need a Salesforce QA expert to shape it from a real-world enterprise QA perspective.

What You'll Do:

- Advise on Salesforce QA workflows, test intent, cross-object validations, and edge cases
- Help AURA support real-world automation scenarios
- Identify gaps and must-have QA features

Ideal Background:

- 8–12+ yrs QA experience with hands-on Salesforce testing
- Worked closely with Salesforce automation teams (Selenium, Playwright, Cypress, Provar, etc.)
- Experience with enterprise Salesforce orgs, multiple personas, and permission models
- Strong in validation beyond UI (data, events, async behavior)
- Strong opinions on what must be validated vs what can be ignored and where automation typically breaks
- Comfortable working alongside AI-assisted or model-driven automation approaches

Engagement & Location:

- Contract / Advisory – 4–6 weeks, 5–8 hours/week, mostly remote(Needed Hyderabad candidates)
- Hyderabad office – 1–2 times per week for syncs

Shared by **Job Curator** - Join us on Telegram: <https://t.me/testingexperiencedopenings>

This is product advisory, not execution. Shape the tool, don't run it.

Key Responsibilities:

- Analyze business and functional software requirements to create detailed test cases and test scripts.
- Design, develop, and execute functional and regression test plans.
- Identify, report, and track software defects and issues.
- Collaborate with development teams to ensure timely resolution of defects.

Shared by **Job Curator** - Join us on Telegram: <https://t.me/testingexperiencedopenings>

- Perform system integration testing and user acceptance testing (UAT).
- Document test results and generate test reports.
- Ensure compliance with quality assurance standards and best practices.
- Continuously improve testing processes and methodologies.

Qualifications and Skills:

- Bachelor's degree in computer science, Information Technology, or a related field.
 - 10 yrs of proven experience as a Functional Tester or Quality Assurance Analyst.
- Extensive experience working on PLM Projects.
- Strong understanding of software development life cycle (SDLC) and testing methodologies.
 - Hands-on experience with test management tools (e.g., JIRA, TestRail).
 - Ability to write clear and concise test cases and test scripts.
 - Excellent analytical and problem-solving skills.
 - Strong communication and collaboration skills to work with cross-functional teams.

Preferred Qualifications:

- ISTQB or other relevant software testing certification.
- Experience with Team Center PLM
- Experience with automated testing tools (e.g., Selenium, QTP).
- Familiarity with Agile or Scrum methodologies

Hiring: QA Engineer (A/B Testing & Load Testing Focus)

Location: USA (Remote / Hybrid options available)

Shared by **Job Curator** - Join us on Telegram: <https://t.me/testingexperiencedopenings>

We are looking for a QA Engineer with strong experience in A/B testing, performance/load testing, and quality automation to join our growing team. If you are passionate about delivering high-quality scalable applications and data-driven product improvements, this role is for you.

Key Responsibilities

Design, execute, and analyze A/B tests to improve product performance and user experience
Perform load, stress, and performance testing using tools like JMeter, LoadRunner, or similar
Develop and maintain automated test frameworks (UI, API, regression, performance)
Collaborate with developers, product managers, and data teams to ensure product quality
Identify defects, track issues, and support continuous improvement initiatives
Validate releases across functional, performance, and scalability dimensions

Required Skills

Experience in QA automation, performance testing, and A/B experimentation
Hands-on with tools such as Selenium, JMeter, Gatling, LoadRunner, or similar
Knowledge of CI/CD pipelines, Agile methodology, and API testing
Strong understanding of test strategy, defect lifecycle, and quality metrics
Familiarity with cloud environments (AWS/Azure/GCP) is a plus

Nice to Have

Experience with data analytics tools for experiment analysis
Exposure to AI/ML or data-driven product environments
Strong scripting skills (Python/Java/JS)
Interested candidates — feel free to DM or comment below. Happy to connect!

Thanks,

Email: vinaykumar.karumanchi@techmellousa.com

=====

Hiring: Appian QA Engineer (6+ Years)

Location: Offshore – Remote

Work Hours: 8:00 AM – 5:30 PM IST

Contract: 1 Year

Job Summary

We are looking for an experienced Appian QA Engineer with 4+ years of hands-on Appian testing experience. The candidate will be responsible for ensuring quality delivery of Appian BPM applications, integrations, and data in an Agile environment.

Key Responsibilities

Analyze requirements and prepare test scenarios and test cases
Perform functional, integration, system, regression, and UAT testing

Shared by **Job Curator** - Join us on Telegram: <https://t.me/testingexperiencedopenings>

Test Appian components like Process Models, SAIL, Records, Rules, Reports, Sites, and CDTs
Test integrations using REST/SOAP APIs
Perform data validation using SQL databases
Log and manage defects using JIRA
Work closely with Developers, BAs, and Product Owners
Support UAT and production releases

Required Skills

6+ years QA experience with 4+ years in Appian testing
Strong knowledge of Appian architecture and workflows
Hands-on experience with Appian 21.x or above
API testing using Postman or similar tools
Strong SQL knowledge (Oracle/MySQL/SQL Server)
Experience in Agile and JIRA

Good to Have

Appian certification
Exposure to automation tools like Selenium
Basic CI/CD or performance testing exposure

interested candidate kindly share resume: akansha@code-aspire.com

QA Engineer (Remote)

We are looking for an experienced QA Engineer to support testing and validation of a Media Pipeline Management & Control Web Application. This is a remote, short-term project with potential extension.

Role: QA Engineer

Experience: 5+ years

Work Mode: Remote

Role Overview:

You will be responsible for validating the functional correctness, reliability, and stability of the web application and associated media processing pipelines. The role involves manual and automated testing across the UI, backend services, and media workflows.

Key Responsibilities:

Develop test plans and detailed test cases from requirements

Execute functional testing of web UI components

Validate backend REST APIs

Test media pipeline behaviors and processing flows

Verify start, stop, restart, and error-handling scenarios

Validate live preview stability and system responsiveness

Perform regression testing across releases

Log, track, and verify defects

Participate in demo scenario validation.

Required Skills:

4+ years of QA experience

Shared by **Job Curator** - Join us on Telegram: <https://t.me/testingexperiencedopenings>

Experience testing web applications
Hands-on experience testing REST APIs
Familiarity with Linux environments
Strong defect tracking and reporting skills.

Preferred:

Experience testing video or streaming systems
Familiarity with FFmpeg or GStreamer
Experience with automated testing tools

Interested candidates can share their resume, current CTC, expected CTC, and notice period via direct message or mail me at agam@immersiveinfotech.com.

Hiring: System Test Engineer | Pune | 6–10 Years Experience

We are looking for an experienced System Test Engineer to join our automation and motion control domain team in Pune. If you have strong hands-on experience in PLC, motion control, robotics integration, and system testing — this could be a great opportunity.

Key Skills Required

- PLC programming (Ladder / Structured Text / Function Block)
- Motion control & multi-axis / robotic programming
- Servo drives, VFDs & inverter configuration and commissioning
- Machine automation & turnkey project testing (FAT / SAT)
- Fieldbus technologies: Ethernet/IP, PROFINET, EtherCAT, CAN, PROFIBUS, etc.
- PLC backplane & remote I/O configuration

Good to Have

- Control panel wiring design knowledge
- Manual testing experience

What You'll Do

- Design and execute end-to-end automation system tests
- Test motion & robotics PLC function blocks before product release
- Analyze requirements and develop system test programs
- Follow structured test processes and quality standards

We're Looking For

- Strong team players
- Fast learners, adaptable, and proactive professionals

Location: Pune (No site travel required)

Qualification: B.E./B.Tech (Electrical / Electronics / Instrumentation / Mechatronics) or MSc (Electronics/Electrical)

Experience: 6–10 years

If this matches your profile or someone in your network, feel free to connect or share on praveen.kumar@mnr solutions.in

#Hiring #Lead #SDET

Lead SDET – AI-Driven Test Automation
REMOTE opportunity(Immediate Joiners are preferred)
Work Type : Permanent Position
Budget : Open(No Bar)

About the Role

We are looking for a Lead SDET to design and own our end-to-end test automation strategy, with a strong focus on AI- and ML-powered testing. In this role, you will drive quality at scale for our AI-first platform, mentor engineers, and collaborate closely with Product, Engineering, and DevOps teams to ensure fast, reliable, and high-quality releases.

What You'll Do

Define and implement a comprehensive automation strategy across web, APIs, backend services, and data workflows.
Build and maintain scalable automation frameworks with AI-assisted capabilities such as

Shared by **Job Curator** - Join us on Telegram: <https://t.me/testingexperiencedopenings>

self-healing tests, intelligent test prioritization, and flaky test detection.

Leverage AI/ML models to generate, optimize, and maintain test cases from requirements and user stories.

Integrate AI-powered analytics to detect anomalies in system performance, user flows, and error patterns.

Use NLP models to create chatbot-driven test cases and validate conversational interfaces.

Collaborate with developers to drive shift-left testing, including AI-driven unit and integration test generation.

Define and own quality dashboards with predictive insights such as defect trends, release risk scoring, and automated root-cause suggestions.

Perform AI-based regression impact analysis to optimize test execution pipelines.

Explore generative AI tools for auto-generating mock data, load scenarios, and security attack simulations.

Mentor and guide team members in adopting AI-first testing practices and best-in-class QA standards.

What We're Looking For

8+ years of experience in QA / SDET roles, with 2+ years in a leadership or lead role.

Strong programming skills in Python, Java, JavaScript, or TypeScript.

Hands-on experience with test automation frameworks such as Selenium, Playwright, Cypress, etc.

Solid expertise in API testing using tools like Postman, RestAssured, Java HTTP Client, or similar.

Proven experience integrating AI/ML tools into automation pipelines, including:

Self-healing automation tools (Testim, Mabl, Functionize, etc.)

AI-driven test case generation and prioritization

Intelligent anomaly detection for QA metrics

Familiarity with AI-based load and performance testing, including ML-driven scale and failure prediction.

Strong experience with CI/CD pipelines (GitHub Actions, Jenkins, GitLab, etc.), including AI integrations.

Knowledge of data validation testing for AI/ML models (bias detection, data drift, accuracy validation) is a strong plus.

Excellent communication, leadership, and mentoring skills, with the ability to influence across teams.

Interested candidates can send your cv's at yuva@hiremaven.co.in will connect with you directly.
