We're Hiring: Software Tester

Experience: 2+ years

Location: Cape Town, South Africa (95% remote)

What You'll Do:

Execute manual and automated testing across web and database systems
Design and run test plans and test cases
Perform RESTful API testing and systems integration testing
Conduct B2B UI/UX and end-to-end testing of critical business processes
Ensure software releases are reliable, consistent, and meet high-quality standards

Skills & Experience Required:

Test Planning & Test Case Design (2+ years)

Shared by **Job Curator** - Join us on Telegram: <https://t.me/testingexperiencedopenings>

RESTful API, Acceptance, Usability, and GUI Testing (2+ years each)
SQL (2+ years)
Familiarity with testing methodologies (ISTQB principles)
Bonus Skills:
Docker, Zephyr for Jira, Playwright (A MUST HAVE) Test Automation
ISTQB Foundation Level Certification

Cleopatra.ike@peoplesolved.com

=====

Automation Tester (Playwright / API)
Location: Remote
Visa:H1B,H4EAD & USC

Role Overview:

We are seeking a skilled Automation Tester with strong experience in Playwright and API testing to design, execute, and maintain automated test solutions. The role involves close collaboration with development teams to ensure high-quality, reliable, and scalable software delivery.

Key Responsibilities:

Design, develop, and maintain automated test scripts using Playwright.
Perform API testing (REST/SOAP) to validate functionality, performance, and security.
Execute automated and manual test cases; analyze and document test results.
Identify, track, and report defects; collaborate with developers for timely resolution.
Integrate automated tests into CI/CD pipelines.
Participate in test planning, requirement analysis, and continuous improvement of testing strategies.

Required Skills & Qualifications:

Proven experience in Software Quality Assurance and Test Automation.
Hands-on expertise with Playwright for end-to-end testing.
Strong experience in API testing using automation tools.
Knowledge of CI/CD tools (Jenkins, GitHub Actions, or Azure DevOps).
Proficiency in JavaScript, TypeScript, or Python.
Solid understanding of SDLC and Agile methodologies.
Strong analytical, problem-solving, and communication skills.

Thanks

Jagadeesh Avula

Jagadeesh.Avula@ba-itconsult.com

#hiring c2c & w2

Position:: AI Penetration Tester

Location:: Remote (USA)

Please share resume at laika@yptllc.com

AI Penetration Tester

- Execute AI-focused penetration testing engagements that include manual penetration testing of systems incorporating AI/ML, objective-based testing of AI-driven features, and coverage of both traditional and AI-centric attack surfaces.
- Perform threat modeling for AI-powered software systems, evaluate AI-related business logic, and conduct architecture reviews. Focus on adversarial ML vectors, prompt-based vulnerabilities, and other AI-specific security risks.
- Develop and improve AI-driven tools and methodologies for offensive security tasks such as discovery, exploitation, fuzzing, and adversarial ML testing, emphasizing web apps, APIs, and mobile clients.
- Demonstrate AI penetration testing findings to technical and non-technical audiences, including live demos.
- Act independently on AI penetration testing with minimal oversight, guiding engagements from planning through execution and reporting.

Qualifications: The skills, abilities, specific knowledge, education, and minimum experience necessary to perform this job.

- Minimum three (3) years of recent penetration testing experience focused on APIs, web applications, and mobile applications. Experience with AI model testing or AI security is highly desirable.
- Proven background in AI red teaming and adversarial attack development, including prompt engineering attacks, LLM-based vulnerability analysis, and model evasion techniques.
- Proficiency with penetration testing tools (e.g., Burp Suite Pro, Netsparker, Checkmarx) and AI security frameworks (e.g., TensorFlow, PyTorch, LLM APIs, LangChain).
- One or more major ethical hacking certifications (e.g., GWAPT, CREST, OSWE, OSHA) and certifications or training in AI security techniques.

=====

We're Hiring: QA Automation Engineer (Remote | USD Payment)

We are looking for a QA Automation Engineer to join our quality team and help ensure high-quality delivery across modern web products. This role focuses on automated testing using our internal tool Scriptless, while also supporting manual testing for React and Angular applications.

Location: Remote

Payment: USD (Contract)

Time Zone: Overlap with Eastern Time preferred

What you'll do:

Design, develop, and execute automated tests using Scriptless

Perform manual testing when needed

Test React and Angular applications for functionality and performance

Create and maintain test cases and documentation in Azure DevOps (ADO)

Track and resolve defects

Collaborate with developers, BAs, and Scrum teams

Shared by **Job Curator** - Join us on Telegram: <https://t.me/testingexperiencedopenings>

What we're looking for:

3+ years in QA Automation / Manual Testing

Experience with automation tools and frameworks

Strong testing background with React and Angular

Experience with Azure DevOps (ADO)

Knowledge of Agile / Scrum

Good communication and troubleshooting skills

If you're passionate about automation, quality, and modern web applications, and want to work remotely with USD payment, let's connect!

Comment or DM to apply.

Position: UiPath Solution Architect

Location: Remote

Role Overview

We're looking for a hands-on UiPath Solution Architect who can design and build enterprise-scale automations, not just review designs. You'll stay close to the code for complex workflows while also shaping architecture, standards, and AI adoption across the automation landscape.

This role works closely with business stakeholders, Developers, security teams, and the RPA CoE to ensure solutions are feasible, secure, scalable, and aligned with enterprise standards.

Key Responsibilities

- Design end-to-end automation solutions using the UiPath platform
- Work directly with business stakeholders to translate requirements into technical and automation feasibility
- Lead solution design, complexity assessment, and effort estimation
- Remain hands-on for complex automations, POCs, and AI-enabled workflows
- Build and govern automations using UiPath Studio and REFramework
- Own and guide usage of UiPath products including:
 - Orchestrator (queues, assets, triggers)
 - UiPath Apps
 - UiPath Maestro (process orchestration)
 - Document Understanding, AI Center, Action Center
- Design AI-enabled automations (IDP, OCR, LLM integration)
- Perform architecture and code reviews; mentor development teams
- Partner with Security and Risk teams for architecture and security reviews
- Ensure solutions align with RPA CoE standards, governance, and design guidelines
- Use Jira to manage automation backlogs, track delivery, support sprint planning, and provide visibility into progress
- Support production stability, performance tuning, and issue resolution

Required Skills & Experience

- Strong hands-on experience with UiPath Studio, Orchestrator, Apps, and Maestro and 5 Plus experience in Architect role
- Proven experience designing enterprise-scale automation architectures
- Good Hands on experience on AI, Document Understanding, and API and LLM integration
- Strong programming skills (C#, [VB.NET](#); Python is a plus)
- Experience with APIs, databases, and enterprise system integrations
- Experience working in Agile teams, using Jira for backlog management and delivery tracking
- Familiarity with GIT CI/CD, version control, and release management
- Ability to clearly explain technical solutions to business stakeholders
- Experience working in or with an RPA Center of Excellence (CoE)

Mandatory Requirement

UiPath Certification is required
UiPath Certified Solution Architect (preferred), or
UiPath Certified Advanced RPA Developer

Please share resume at Anusha@americanunit.com

Senior QA Advisor – Salesforce Testing (Contract / Freelance)

We are building AURA, an AI-assisted QA automation platform, and need a Salesforce QA expert to shape it from a real-world enterprise QA perspective.

What You'll Do:

- Advise on Salesforce QA workflows, test intent, cross-object validations, and edge cases
- Help AURA support real-world automation scenarios
- Identify gaps and must-have QA features

Ideal Background:

- 8–12+ yrs QA experience with hands-on Salesforce testing
- Worked closely with Salesforce automation teams (Selenium, Playwright, Cypress, Provar, etc.)
- Experience with enterprise Salesforce orgs, multiple personas, and permission models
- Strong in validation beyond UI (data, events, async behavior)
- Strong opinions on what must be validated vs what can be ignored and where automation typically breaks
- Comfortable working alongside AI-assisted or model-driven automation approaches

Engagement & Location:

- Contract / Advisory – 4–6 weeks, 5–8 hours/week, mostly remote(Needed Hyderabad candidates)
- Hyderabad office – 1–2 times per week for syncs

This is product advisory, not execution. Shape the tool, don't run it.

Interested? Apply: m.sharanya@enspirit.co

Hiring: System Test Engineer | Pune | 6–10 Years Experience

We are looking for an experienced System Test Engineer to join our automation and motion control domain team in Pune. If you have strong hands-on experience in PLC, motion

control, robotics integration, and system testing — this could be a great opportunity.

Key Skills Required

- PLC programming (Ladder / Structured Text / Function Block)
- Motion control & multi-axis / robotic programming
- Servo drives, VFDs & inverter configuration and commissioning
- Machine automation & turnkey project testing (FAT / SAT)
- Fieldbus technologies: Ethernet/IP, PROFINET, EtherCAT, CAN, PROFIBUS, etc.
- PLC backplane & remote I/O configuration

Good to Have

- Control panel wiring design knowledge
- Manual testing experience

What You'll Do

- Design and execute end-to-end automation system tests
- Test motion & robotics PLC function blocks before product release
- Analyze requirements and develop system test programs
- Follow structured test processes and quality standards

We're Looking For

- Strong team players
- Fast learners, adaptable, and proactive professionals

Location: Pune (No site travel required)

Qualification: B.E./B.Tech (Electrical / Electronics / Instrumentation / Mechatronics) or MSc (Electronics/Electrical)

Experience: 6–10 years

If this matches your profile or someone in your network, feel free to connect or share on praveen.kumar@mnrnsolutions.in

Must have:

- Bachelor's degree, or equivalent. Prefer degree in Computer Information System or MIS
- At least 3-5 years of experience in a QA/UAT Analyst role
- Experience with Tosca automation platform
- Ability to maintain and run automation scripts
- Ability to balance technical skills with business savvy – ability to transform end-user requirements into system and end user test cases
- Ability to quickly learn and adapt to various business systems and processes as well as testing tools and methodologies
- Excellent time management and organizational skills; able to work efficiently while meeting tight deadlines and multiple competing priorities
- Exceptional analytical and problem-solving skills; ability to work creatively in problem solving environment and ability to think outside the box in order to ensure testing is thorough
- Outstanding written and verbal communication skills
- Ability to take initiative in researching problems and proposing solutions
- Willingness to work flexible and/or extended hours to complete project tasks and coordinate migrations and/or calls with stakeholders in various time zones after hours
- Knowledge of salesforce

HIRING • Mobile QA Engineer • 100% Remote Europe

Mobile QA Engineer

WORK MODE: 100% Remote Europe

COMPANY SIZE: 11-50

COMPANY HQ LOCATION: Poland

SKILLS OF A PERFECT CANDIDATE

Proven experience testing mobile applications on both iOS and Android platforms
Solid understanding of manual and automated testing methodologies
Programming knowledge in Java or Python for test automation
Hands-on experience with Appium, Selenium, or similar tools
Familiarity with Agile/Scrum development methodologies
Strong analytical and troubleshooting skills

Shared by **Job Curator** - Join us on Telegram: <https://t.me/testingexperiencedopenings>

Experience working in a Scrum team environment
Proficiency with defect tracking systems like JIRA
Ability to write clear, concise, and comprehensive test plans and cases
Good communication and teamwork abilities
Experience testing mobile apps in the financial or fintech sector
Knowledge of CI/CD pipelines and mobile build systems
Familiarity with cloud-based testing platforms (e.g., BrowserStack, Sauce Labs)
Exposure to performance and security testing for mobile apps

INTERESTED?

Write to job@monikasaleta.com and explain shortly your relevant experience to the role.

#Hiring #Lead #SDET

Lead SDET – AI-Driven Test Automation
REMOTE opportunity(Immediate Joiners are preferred)
Work Type : Permanent Position
Budget : Open(No Bar)

About the Role

We are looking for a Lead SDET to design and own our end-to-end test automation strategy, with a strong focus on AI- and ML-powered testing. In this role, you will drive quality at scale for our AI-first platform, mentor engineers, and collaborate closely with Product, Engineering, and DevOps teams to ensure fast, reliable, and high-quality releases.

What You'll Do

Define and implement a comprehensive automation strategy across web, APIs, backend services, and data workflows.

Build and maintain scalable automation frameworks with AI-assisted capabilities such as self-healing tests, intelligent test prioritization, and flaky test detection.

Leverage AI/ML models to generate, optimize, and maintain test cases from requirements and user stories.

Integrate AI-powered analytics to detect anomalies in system performance, user flows, and error patterns.

Use NLP models to create chatbot-driven test cases and validate conversational interfaces.

Collaborate with developers to drive shift-left testing, including AI-driven unit and integration test generation.

Define and own quality dashboards with predictive insights such as defect trends, release risk scoring, and automated root-cause suggestions.

Perform AI-based regression impact analysis to optimize test execution pipelines.

Explore generative AI tools for auto-generating mock data, load scenarios, and security attack simulations.

Mentor and guide team members in adopting AI-first testing practices and best-in-class QA standards.

What We're Looking For

8+ years of experience in QA / SDET roles, with 2+ years in a leadership or lead role.

Strong programming skills in Python, Java, JavaScript, or TypeScript.

Hands-on experience with test automation frameworks such as Selenium, Playwright, Cypress, etc.

Solid expertise in API testing using tools like Postman, RestAssured, Java HTTP Client, or similar.

Proven experience integrating AI/ML tools into automation pipelines, including:

Self-healing automation tools (Testim, Mabl, Functionize, etc.)

AI-driven test case generation and prioritization

Intelligent anomaly detection for QA metrics

Familiarity with AI-based load and performance testing, including ML-driven scale and failure prediction.

Strong experience with CI/CD pipelines (GitHub Actions, Jenkins, GitLab, etc.), including AI integrations.

Knowledge of data validation testing for AI/ML models (bias detection, data drift, accuracy validation) is a strong plus.

Excellent communication, leadership, and mentoring skills, with the ability to influence across teams.

Interested candidates can send your cv's at yuva@hiremaven.co.in will connect with you directly.
