PROFESSIONAL SUMMARY

Results-driven Java Developer with 3 years of experience in designing, developing, and maintaining scalable backend applications using Java 8, Spring Boot, and REST APIs. Skilled in building high-quality APIs, writing robust JUnit/Mockito test suites, and ensuring code quality through SonarQube. Hands-on experience in middleware systems (SST, ePro), microservice integrations. Strong collaborator with expertise in debugging, performance optimization, and delivering reliable solutions in fast-paced, enterprise banking environments.

PROFESSIONAL EXPERIENCE

Bank Of America – Hyderabad, India Software Engineer 1-B

03/2023 – till today

- 3 years of experience in **Java development**, specializing in **building scalable, maintainable backend systems**
- Strong hands-on experience with **Java 8+**, OOP, Collections, Streams, Exception Handling, Multithreading basics.
- Experience working in **Banking/Finance domain** (Bank of America), focusing on middleware and data processing.
- Wrote **unit and integration tests** using **JUnit** and **Mockito**, achieving over 80% code coverage.
- Participated in **code reviews** and followed **Agile methodologies (Scrum, Jira)** for sprint planning and task tracking.
- Developed test scripts in Java to automate end-to-end test cases for REST APIs using **Rest Assured**.
- Used **Postman Collections/Newman** for automated API test runs.
- Validated backend logs (Splunk/Kibana) to identify root causes of failures.
- Supported **CI/CD QA pipeline** improvements using Jenkins
- Involved in **bug triaging**, defect tracking, and root cause analysis with dev and QA teams.
- **Testing & Quality:** "Achieved 90%+ code coverage by implementing comprehensive unit and integration tests using **JUnit** and **Mockito**, significantly reducing production bugs in the core payment gateway module."
- **Scalability & Microservices:** "Developed and maintained high-throughput banking microservices using **Spring Boot** and **Java 17**, optimizing API response times by 30% through effective caching and asynchronous processing with **Kafka & Redis cache**."
